About the Congress

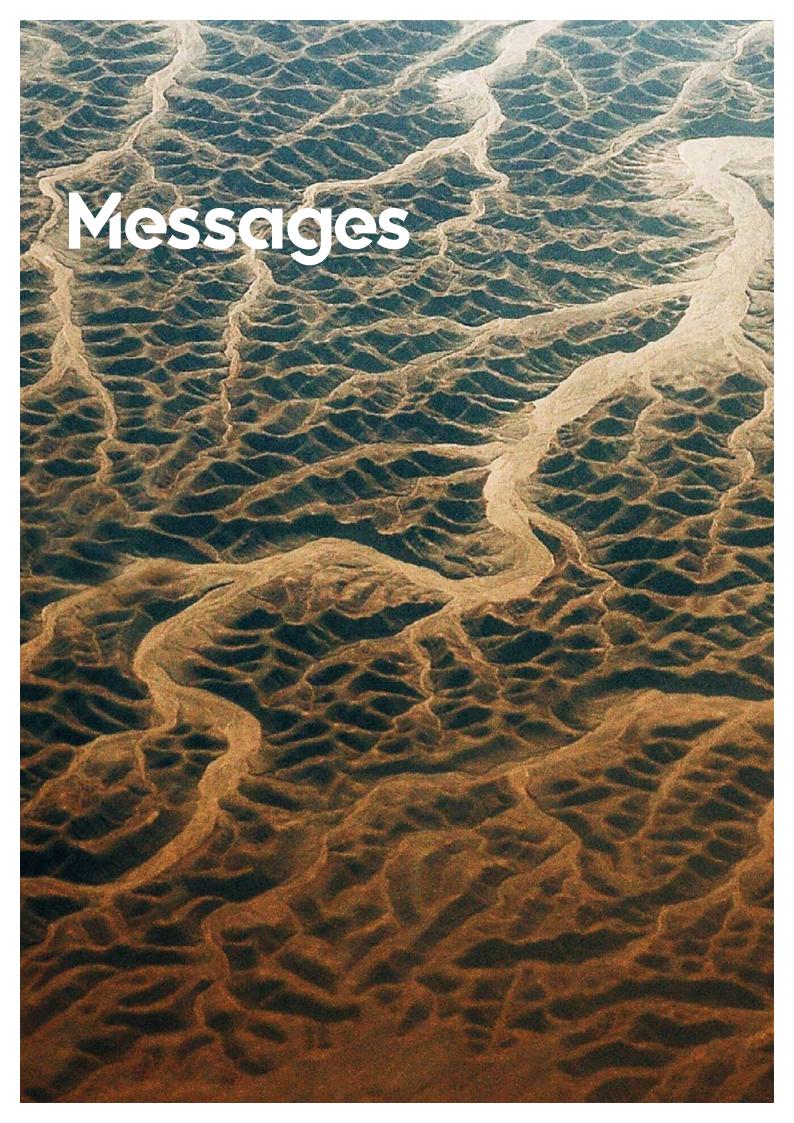

The IUCN Africa Protected Areas Congress (APAC) is the first-ever continent wide gathering of African leaders, citizens, and interest groups (including the civil society, community leaders, protected area authorities, private sector, international institutions, and more) to discuss the role of protected areas in conserving nature, safe-guarding Africa's iconic wildlife, and delivering vital life-supporting ecosystem services–all while promoting sustainable development and conserving Africa's cultural heritage and traditions. The Congress has been co-convened by the International Union for Conservation of Nature-World Commission on Protected Areas (IUCN-WC-PA) in partnership with the Rwanda Ministry of Environment and the African Wildlife Foundation.

The overarching objective of APAC is to stress implementation of actions agreed to halt biodiversity loss and land degradation, address climate change and support delivery of the Sustainable Development Goals (SDGs) using protected and conserved areas as one implementation mechanism.

The official working languages of the IUCN Africa Protected Areas Congress will be English, French and Portuguese.

Objectives

- Make a strong case for African leadership and commitment to implement a development vision prioritizing nature and societal aspirations for sustainable and resilient outcomes.
- Agree on practical actions to promote the value and role of protected and conserved areas to enhance resilience, support sustainable development, human welfare and well-being.
- Agree on the underlying drivers of biodiversity loss and seek commitments from African and developed country governments to comprehensively address these.
- Agree on practical measures to enhance effective governance and management of protected and conserved areas to achieve their biodiversity and social outcomes and ensure social and environmental sustainability.
- Agree on practical measures to recognize, elevate, and uphold the rights, responsibilities and roles of indigenous people, local communities and young people in conserving nature.
- Agree on key messages and effective platforms to advocate for protected and conserved areas to be high on the agendas of Governments, society, local communities, the private sector, and partners as part of post pandemic nature-positive recovery efforts.
- Launch effective Pan African networks, partnerships and cooperation mechanisms to support the effective management of protected and conserved areas and ensure their long-term sustainability including a Cooperation Agreement, a Directors' Platform, and a Conservation Trust.

Message from the Minister of Environment, Rwanda

Dr Jeanne d'arc Mujawamariya Minister of Environment, Rwanda

Greetings and a big welcome to delegates attending the Inaugural Africa Protected Areas Congress (APAC) being hosted in Kigali, Rwanda. The Government of Rwanda is honoured to host this landmark Congress which has been co-convened by the Rwanda Ministry of Environment, the International Union for Conservation and Nature (IUCN) and the African Wildlife Foundation (AWF) with support from various partners. Rwanda has been an IUCN member since 2016. We believe in taking a proactive approach that puts the environment and climate change at the heart of our country's policies.

Globally we are facing a climate change crisis, and Africa will bear the biggest brunt from the impacts of climate change despite having the lowest contribution of greenhouse gas emissions. Many of Africa's people rely directly on natural systems for their well-being. This makes African people particularly vulnerable to overexploitation of the continent's natural assets and destruction of its natural systems.

As the continent continues to look towards advanced economic growth, we must collectively push the green growth agenda. As emphasized by His Excellency the President of Rwanda, Paul Kagame, economic development should not be a choice between environment and prosperity, but rather how we can combine both, because one supports the other. It will take political will, partnerships and innovation to make this happen.

The IUCN Africa Protected Areas Congress gives us an opportunity to look at how Africa can adapt policies that benefit both conservation and economic development to arrive at solutions that are good for nature and good for people. In addition, looking at how approaches can be scaled up to reduce risk and increase efficient and sustainable use of resources. Improved natural resource management will mitigate threats on the environment and economic growth, while reaping the benefits of Africa's abundance.

It is our hope that, you will find Kigali an exciting, inspiring, educational, and enriching city. We wish you all fruitful deliberations.

Message from the Regional Director, IUCN Eastern and Southern Africa

Luther Anukur, Regional Director, IUCN Eastern and Southern Africa On behalf of IUCN the International Union for the Conservation of Nature, I have the pleasure to welcome you to Kigali, for the very first IUCN Africa Protected and Conserved Areas Congress (APAC).

IUCN exists to influence, encourage and assist societies throughout the world to conserve the integrity and diversity of nature and ensure that the use of natural resources is equitable and ecologically sustainable.

In many ways, APAC symbolises the start of a new dialogue and platform to position protected and conserved areas beyond biodiversity conservation to being key pillars in tackling climate change and achieving sustainable development. Besides the environmental benefits, these areas produce significant economic returns and are the foundation for the livelihoods of millions of African households. Unfortunately, despite the significant monetary and non-monetary values of protected and conserved areas, their importance remains poorly understood and greatly undervalued.

The Congress will be solution focused, generating ideas on human rights, gender equity, environmental responsibility, conflict prevention and resolution as well as sustainable financing. Happening amidst today's multiple crisis, APAC presents a huge opportunity of bringing together the needed diverse voices from African governments, private sector, communities and development partners to seek lasting solutions.

These discussions are also about Africa's rich heritage and legacy. At present, 48 of the 252 natural and "mixed" natural-cultural sites on the UNESCO World Heritage List are in Africa, including places such as the Okavango Delta, the Serengeti Plains, the Virunga Mountains, the Namib Desert, and Mount Kilimanjaro. It is against such, that we hope the rich experiences, ideas and discussion at the Congress will inspire the young people to enact a positive change in their communities and future generations.

I wish to thank the Government of Rwanda for the commitment to host APAC. I also take this opportunity to thank Africa Wildlife Foundation for the partnership and joint leadership in organizing this Congress along with other partners.

We are sure that, as Kigali has been the starting point for this new discourse in Africa, it will inspire millions across the continent to recognise, value and position protected and conserved areas at the centre of sustainable development.

We welcome you to learn, share, network and engage.

Message from CEO, African Wildlife Foundation

Kaddu Sebunya, CEO, African Wildlife Foundation The African Wildlife Foundation takes great pleasure in welcoming you to this important milestone – this inaugural congress that is indeed a proof that our efforts over the years have not been in vain.

As an organization that is celebrating 60 years since our existence and one of the loudest champions of African, and wildlife voices, we at AWF – are guided by our mission that dictates that conservation and development are intertwined and that the sustenance of our planet relies heavily on our relationship with nature where people are at the center of conservation - that conservation success in Africa relies on African leadership, it is us we are waiting for.

The state of Africa's wildlife and wild areas is approaching a critical tipping point, but it is not too late to act. That is why AWF has made a deliberate commitment to build a future for Africa where people and wildlife thrive. And we take great pride in the central role we are playing to raise an African leadership and constituency in conservation and this congress is one of the major steps towards achieving this.

To the 70% of Africans - the youth at this conference, it is your responsibility, to demand better more responsible action from the government, civil societies, private sector. You are the majority on this continent, and therefore, carry the responsibility to ensure that you leverage as much as you can from the discussions at this conference to create a more unified continent as had been envisioned by our forefathers.

To our hosts, the Government of Rwanda, I would like to take this opportunity to commend you for your global servant leadership through the numerous unprecedented strides you have made in biodiversity restoration and conservation. Truly, there was no better candidate to play host to this auspicious occasion.

I would also like to congratulate IUCN, for the great partnership and contributions to this inaugural congress.

To everyone here in Kigali this week, let us remember that we all have a role to play. So, this congress should be seen as our resolve to rise in the face of this pandemic, and create the healthy, prosperous, and sustainable Africa that Africans so desire. Securing nature in Africa results in global benefits to humanity.

We welcome you all as we embark on forging a new trajectory for a modern and environmentally conscious Africa where human development - includes thriving wildlife and extensive wild lands for all of us globally and our future generations.

Sincerely

BUILDING A FUTURE

FOR AFRICA WHERE

PEOPLE AND

WILDLIFE THRIVE

#NATURESVALUE

Guidelines for Engagement During the Congress

- APAC brings together and focuses on African Voices to deliberate on and make recommendations and agree on actions about African challenges and opportunities and the expectation is that it will be participatory, inclusive, and embrace different ideas and approaches.
- 3. Youth and IPLCs will be represented in discussions, panels, and as speakers, given the importance of IPLCs and various forms of community conserved areas. Likewise, gender equity will be strived for in all the sessions and events, and especially for the panels.
- 4. Since APAC will focus on both State-owned protected areas AND various other forms of community and privately conserved areas, they will all receive equal treatment during discussions and in terms of representation as speakers and on panels. A focus will loosely be placed on those who have responsibility for conserved areas of all sorts, for example, community conserved areas, privately conserved areas, as well as state ownership.
- There are issues that are controversial and very difficult to reach a consensus on. What will be done is to have the space to discuss openly the issues based on the best information, on-the-ground experience, and concrete proposals to move forward.
- 6. Agreement will be strived for in terms of the various issues, recommendations and actions. However, it should also be expected that whatever we cannot agree on, we will propose ways to work together, and, if necessary, agree to disagree.
- 7. APAC is a congress for open and constructive dialogue. It is not a research symposium, nor does it have any formal negotiation status. But should participants have research findings they want to highlight this can be done through the call for proposals for posters and exhibition space.
- 8. APAC will be an important opportunity for learning from each other, for example, the different approaches used to try and address the COVID-19 pandemic and its impacts on conserved areas.

Ground Rules

- Everyone's voice counts all participants can speak, make suggestions, and have their voices heard, during discussions in a manner that is safe, conducive, respectful, and without interruption. Balance will be sought in terms of voice in the context of different organizations and interest groups, and participants.
- 2. All participants will be made welcome in the spirit of constructive dialogue and agreement by consensus.
- 3. Unless necessary, due, for example, to bad behavior, participants will not be interrupted when speaking. However, if interventions continue for too long, the chairperson will request the speaker to wrap up.
- 4. Given some of the issues that might be discussed could be contentious, consensus will be strived for. Failing that, a small working negotiating group of interested participants will be requested to meet in a side meeting to try to resolve the issue(s) and come up with a proposed language that is acceptable to all.
- 5. This is an Africa APAC, and Africa's voices will be emphasized. The "Voice of Africa" is the key "container" in which APAC takes place. In the various sessions, participants will be polite and listen to when others are speaking.
- 6. APAC will organize some facilitators/moderators who are experts in the subject matter and ensure the ground rules are adhered to.

Eco-Friendly Actions

- Use of plastic is prohibited at the Congress and more particularly plastic bottles.
- Use glass water bottles provided or bring your own water bottle or use reusable cups
- Use reusable bags (plastic bags will not be allowed at the Congress).
- Favour digital media (mobile apps, Congress website, QR Codes) in order to reduce paper use. If you need to print, consider double-sided and black-and-white printing.
- Minimize paper consumption
- Minimize your use of energy (electricity, water) when on site
- Use Water responsibly
- Consider requesting portions that suit your appetite to reduce food waste.
 - Implement the five Rs during the Congress
 - Refuse: what you don't need and single use items.
 - Reduce: waste and unnecessary items.
 - Reuse: durable objects
 - Recycle: objects and materials that cannot be recovered otherwise.
 - Return to the earth: compost organic matter

Gender Equality and Anti-Harassment

- Harassment, including sexual harassment, bullying, discrimination and intimidation of any kind, will not be tolerated at the Congress (during the event, but also during preparations, setup and dismantling).
- In the event of harassment or discrimination (victims or witnesses), do not hesitate to report it as soon as it occurs, before, during and after the Congress by using the email address info@apacongress.com or contacting APAC Secretariat on site who will have "APAC Secretariat" badge
- Behave in an exemplary manner and comply with the IUCN anti-harassment and anti-discrimination policy.

COVID 19 Measures during the Congress

The Government of Rwanda, IUCN and AWF continue to closely monitor the COVID-19 situation and will implement the necessary measures to ensure maximum safety for participants, in compliance with applicable regulations. To stay updated on Covid-19 guide-lines in Rwanda, please visit the Rwanda Biometrical Center website <u>here</u>.

Congress Agenda - Short Version

day 1 Agenda for Opening plenary

Monday 18 July 14:00 - 20:00

Monday 18 July APAC - Leadership Dialogue-Opening Ceremony

The Master of Ceremony - Victoria Rubadiri.			
Arrival of all delegates to the venue (KCC Auditorium)			
All delegates seated in the KCC AUDITORIUM			
Arrival of VIPs (Ministers +Heads of International Institutions)			
Arrival of Guest of Honour + Former Heads of State and Government.			
MC introduction (5 Min), cultural performance (10 Min), video clip showcasing Africa's natural heritage (5 minutes)			
 Keynote addresses will be made by (20 minutes): 1. Razan Al Mubarak (Pre-recorded video) – President of IUCN – 5 minutes 2. Phoebe Matunda Mzee –Youth Representative – 5 minutes 3. Milka Chepkorir- IPLC representative – 5 minutes 4. Kaddu Sebunya – CEO and President of AWF – 5 minutes 5. Bruno Oberle - Director General, IUCN – 5 minutes 6. Dr. Edouard NGIRENTE, Rt. Hon. Prime Minister, Republic of Rwanda – 5 minutes 			
Opening plenary panel moderated by Mohammed Valli Moosa, Deputy Chairperson of the Presidential Climate Commission, South Africa Panelists: 1. Prime Minister Hailemariam Desalegn Boshe, Ethiopia 2. President Mahmadou Issoufou, Niger 3. Dr. Jeanne d'Arc Mujawamariya, Minister of Environment, Rwanda 4. Hon. Mohammed Abdullahi, Minister of Environment, Nigeria 5. Hon. Najib Balala, Minister of Tourism and Wildlife, Republic of Kenya Discussants: • Former President of Botswana, H.E. Festus Mogae • Tedros Ghebreyesus, Executive Director/WHO, Statement delivered by Dr. Theopista Kabuteni, WHO Country Rep for Rwanda			

Short 3-minute interventions from (pre-recorded videos or in person) delivered after the key note address

1. Monica Medina, Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs of the United States

2. Mami Mizutori, Special Representative of the UN Secretary General for Disaster Risk Reduction

^{3.} Inger Andersen, Executive Director UNEP

Soft launch (Unveiling Logo and cutting ribbon) of a Pan African Conservation Trust Fund presided over by Prime Minister Hailemariam Desalegn Boshe. (3 min film, 5 Min remarks by Prime Minister Hailemariam Desalegn Boshe, 2 Min for unveiling of A PACT). MC- Inviting the VVIPs to unveil the A-PACT

Participants

1. Dr. Edouard NGIRENTE, Rt. Hon. Prime Minister, Republic of Rwanda

2. All Former Heads of State Present

3. AWF-Chief Executive Officer and President

6:20pm -8:00pm

6:20pm -8:00pm

E

6:10 pm - 6:20

MC inviting Congress Participants to a Cocktail and Welcome Reception hosted by Ministry of Environment on behalf of the Government of Rwanda

Side Event 1

Master of Ceremony-Juliet KABERA, DG-REMA

- 12:30 13:00 Arrival of students from Kigali Parents School (30 students) 🛛 13:00 13:45 PM Guided tour and bird watching with students
- 13:45 14:15 Bicvcle ride
- 14:00 Arrival of VVIPs at Nyandungu Restaurant outdoor area
- 14:15 Unveiling of Nyandungu Eco-Park by the Guest of Honour (Rt. Hon. PM of Rwanda)
- 14:30 14:35 Introduction by MC
 - 14:35 14:40 Poem on the importance of wetlands by Kigali Parents School Student 🛙 14:40- 14:45 Remarks by the Gasabo District Executive Administrator 🛛 15:00 Departure to Kigali Convention Centre.

List of invited Guests to Nyandungu Eco-Park Unveiling

- Rt. Hon. Prime Minister of Rwanda
- Former Prime Minister of Ethiopia, H.E. Hailemariam Desalegn
- Former President of Botswana, H.E. Festus Mogae
- Former President of Niger, H.E. Mahmadou Issoufou
- President, International Union for Conservation of Nature (IUCN), Mohammed Valli, Moosa
- Bruno Oberle, Director General, International Union for Conservation of Nature (IUCN)
- Kaddu Sebunya, CEO, African Wildlife Foundation
- Amy Fraenkel, Executive Secretary, Convention on the Conservation of Migratory Species of Wild Animals (CMS)
- Shamila Nair-Bedouelle, Assistant Director General, United Nations Educational, Scientific and Cultural Organization (UNESCO)
- Juliette Biao Koudenoukpo, Director, UN Forum on Forests.
- Executive Secretary, COMIFAC
- Marco Lambertini, Director General, World Wildlife Fund
- Herve Martial Maidou, Executive Secretary, Convention on Biological Diversity
- Frank Turyatunga, Acting Director and Regional Representative for Africa, UN Environment Program
- Dr. Jeanne d'Arc Mujawamariya, Hon. Minister of Environment, Rwanda
- Clare AKAMANZI, Chief Executive Officer, Rwanda Development Board
- Pauline Umwali, Gasabo, District Executive Administrator
- Omar Daair, High Commissioner of the United Kingdom to Rwanda
- Juliet KABERA, Director General, Rwanda Environment Management Authority
- Teddy Mugabo, Chief Executive Officer, Rwanda Green Fund
- Mohamed Imam Bakarr, Lead Environmental Specialist, Global Environment Facility
- Mark Ransom, Managing Director, OA Venue Solutions
- Basile KARIMBA, Managing Director, AFRI landscapes Ltd
- Belise Kariza, Country Director, Africa Wildlife Foundation
- Andrea Athanas, VP Enterprise and Investment Africa Wildlife Foundation
- Alistair Pole, Senior Director Project Management and Partnerships/AWF
- Masozera Michel, Executive Director, Rwanda Wildlife Conservation Association
- Michaella Rugwizangoga, Chief Tourism Officer, Rwanda Development Board
- Eugene Mutangana, Conservation Management Expert, Rwanda Development Board
- Frank GISHA, Director General, Rwanda Chamber of Tourism
- Kigali Parents School students and teachers (30 Pupils and 2 teachers)
- Media partners.

Note:

- APAC has an overall agenda comprising the following four main components: a) High level Leadership Dialogues, the streams and themes (the "Main Agenda"); b). Events (workshops, clinics, cafes, campuses) as per There are still gaps to fill and speakers to confirm - these gaps will be filled in the coming weeks

- The agenda is chronological in so far as is possible (given the number of parallel events);
- This is a near final draft of the Main agenda and the calendar of events but it will be updated as needed in the coming weeks

day 2 **APAC Leadership Dialogue Plenary Agenda** Tuesday 19 July

19 July, 8.30-10.00 , KCC Auditorium HL-2 Challenges and Opportunities for Protected and Conserved Areas

Manager: Madhu Rao; Staff Support: Philip Muruthi, Leo Niskanen

This Leadership Dialogue will synthesize the key challenges and opportunities of Protected and Conserved Areas (PCAs) in Africa to: a) set the tone and introduce the congress; b) present the status of PCAs in Africa and their major challenges (especially management effectiveness and governance); c) introduce the ambition of new target and challenges to achieve it - in marine and terrestrial realms; and where opportunities lie and how to seize them, with a focus on OECMs. There will be a special video on the status of PCAs with panel reflections. - Shamila Nair - Bedouelle, Assitant Director General UNESCO () will moderate this Leadership Dialogue.

Kev Note Addresses by:

- Hon. Paula Francisco Coelho, Secretary of the State for Environment, Republic of Angola Kaddu Sebunya CEO and President of AWF

There will be a panel with the following panellists:

- Hon Lee White, Ministre des Eaux, des Forêts, de la Mer, de l'Environnement , Chargé du Plan Climat and du Plan d'Affectation des Terres, Gabon
- Juliette Bio Koudenoukpo, Executive Director, UN Forum on Forests Amy Fraenkel, Executive Secretary of the Convention on the Conservation of Migratory Species of Wild Animals Afred Oteng Yeboah, Chair of IPBES / IPCI steering committee Marco Lambertini, Director General WWF International

Video: Elizabeth Maruma Mrema, UN CBD

This will be followed by an open question and answer session and a concluding summary by the moderator.

Tuesday 19 July, 10:30-12:00, KCC Auditorium Introducing APAC Streams and Themes -Addressing the challenges and making the "pitch"

Moderated by (Kaddu Sebunya); Session Manager (Helena Motta, Edmund Barrow)

This session will inform participants of the scope and direction of each APAC Stream. This is an opportunity for participants to identify sessions that interest them. The session will emphasize the Congress with a "Call for Action", and link the Leadership Dialogues (Challenges and Opportunities of Protected and Conserved Areas) to the rest of the APAC agenda. The session will be exciting, graphic and visual, with short films linked to different streams and cross-cutting themes, and experts speaking about each of the thematic areas.

0.30 - 12.00

3.30 - 10.00

HL-3

After short introductions as to (a) why APAC (Luther Anukur, IUCN), (b) with what objectives (Fred Kumah, AWF), and (c) why in Kigali (Beatrice Cyiza, Government of Rwanda), the APAC stream and cross-cutting theme leads will present their rationale and motivation for their subjects, provide briefs on each theme, and what APAC intends to deliver. The stream and cross-cutting theme leads are: Protected Areas stream (Samuel Kasiki and Philip Muruthi), People stream (Fiesta Warinwa and Monipher Musasa), Biodiversity stream (Michel Masozera and Youssouph Diedhiou), Governance theme (Tanya Merceron), Climate Change theme (Harisoa Rakotondrazafy), Conflict theme (Christian Noirard), Science, Technology and Indigenous Knowledge theme (Florence Palla), Sustainable Finance theme (Sue Snyman), and Infrastructure theme (Lucy Waruingi).

The moderator will lead discussion as to how the streams and themes will engage with the key challenges of PCAs, through the following sorts of questions: What are the key challenges facing PCAs? How will this stream, theme, workshop, or pavilion address these challenges? What sorts of outcomes do you expect?

The session will end with a moderated discussion involving audience and panel.

Three Parallel Stream Plenaries

Tuesday 19 July from 14:00-17:30

	Tuesday 19 July, 14:00-17:30, KCC Auditorium
ST-1	Stream 1 Parallel Plenary - Promoting effective and equitable networks of PCAs
	in Africa

Session Manager: Philip Muruthi

Panel 1: How effective are protected areas in conserving biodiversity and ecosystem services- constraints and opportunities for management effectiveness (including representativity, connectivity)

Panel 1 will be moderated by Daniel Marnewick (IUCN) who will introduce the status of PCA effectiveness and how it relates to the Aichi targets, equity, fairness, participation and sustainability. Amy Fraenkel (Executive Secretary of the Convention on the Conservation of Migratory Species, CMS) will make one keynote address on CMS and Africa regional perspectives, including the link between connectivity and effectiveness. There will be a keynote address by APAD (Dr Charles Musyoki, Kenya), who will discuss PA management effectiveness for Africa. This will include a summary of the main challenges and opportunities for management effectiveness of PAs in Africa.

There are 5 panellists: Patience Gandiwa (Zimbabwe Parks), Kaori Yasuda (IUCN-Rwanda), Jimmiel Mandima (IFAW), and Abilio Rachid SAID (Instituto da Biodiversidade e da Áreas Protegidas, Guinea Bissau). Patience Gandiwa will share findings from the APAD survey on trends in the role of infrastructure in PA networks. Kaori Yasuda will discuss the IUCN Green List where Rwanda, other countries and partners showcase Africa's commitments. Jimmy Mandima will show how important it is to protect migratory species in East and Southern Africa PAs by ensuring connectivity and safe passage between critical subpopulations and maintain and ensure healthy and resilient ecosystems. Abilio Rachid SAID da Silva will discuss the importance of connectivity of PAs as essential for fulfilling conservation objectives and addressing climate change.

After the panellists have made their presentations, the audience will break into groups to discuss various questions and issues: How can we improve management effectiveness of protected and conserved areas in Africa? What lessons are we learning? What actions do we need to implement? What are the gaps and how can we fill them?

Tuesday 19 July, 14:00-17:30, Room MH1

sT-2 Stream 2 Parallel Plenary – People: Championing community-led conservation in Africa

Session Manager: Fiesta Warinwa

Panel 1: Championing community-led conservation in Africa

There is a growing consensus that to address the biodiversity and climate change crisis, and to protect and restore ecosystems, requires the support and scale of solutions indigenous people, local communities, and grassroots initiatives offer. Scientists agree we must accelerate conservation, particularly initiatives to restore and sustain ecosystems on a larger scale, to prevent severe climate and biodiversity catastrophes. Indigenous peoples and local communities (IPLCs), owning and using roughly 50% of the land are a critical part of the solution, despite not always having legal rights over their territories. The panel will provide case studies from some grassroots conservation leaders who are championing innovative, and successful community-led conservation. Whinie Kiiru (Elephant Protection Initiative, Nairobi) will moderate and introduce the session, which will provide case studies from across Africa and some grassroots conservation efforts

A TEDx –talk by Kanyike Sena (Indigenous Peoples of Africa coordinating Committee, IPAC) will highlight different rights-based approaches to conservation, their advantages and challenges, the lessons we can learn from them and how they can be upscaled. A keynote address by Dickson Kaelo (Kenya Wildlife Conservancy Association) will provide a bigger context into community led conservation in terms of the governance structures and the different institutional needs. Four panellists will discuss various aspects: Joseph Itongwa (ICCA consortium) will highlight how important an enabling policy environment is for community-led conservation. Njenga Kahiro (Maliasili) will share the capacity building needs for effective community engagement in conservation. Angela Sanau from Masaai Mara Wildlife Conservancies Association (MMWCA) will discuss the community benefits & role of IPLCs, Youth & Women in successful conservation in Africa. While Malidadi Langa (Community Leaders Network) will highlight challenges and threats to devolving authority of State-owned PAs to external entities.

After panellists make their presentations, the audience will, in groups, discuss questions introduced by the moderator.

Tuesday 19 July, 14.00-17.30, Room T1

ST-3 Stream 3 Parallel Plenary–Biodiversity: Unlocking the opportunities of biodiversity conservation in Africa

Session Manager: Michel Masozera

Panel 1: Unlocking the opportunities linked to biodiversity conservation in Africa?

Trevor Sandwith (IUCN,) will moderate and introduce the importance of understanding the state of biodiversity in Africa. Ariella Kageruka (Head of Tourism and Conservation Department, RDB) will deliver a TEDx on the biodiversity economy for Africa, and highlight key issues, challenges, and opportunities for the future and reflect what 30x30 means for Africa. Alice Ruhweza (WWF Africa) and Dr Arona Soumare (African Development Bank), in their keynote addresses, will develop these ideas as to what we need to do differently to unlock the potential of Africa's biodiversity, align Africa with principles for Green Growth and understand how to avoid future pandemics? Ms Chantal Marijnissen (Head of Unit Environment and Sustainable Natural Resources, Directorate-General for International Partnerships,EU) will talk about how to move beyond the business as usual funding model to sustainable financing for biodiversity conservation in Africa?

There are five panellists from regional bodies including Domingos Gove (SADC), Christophe Deguenon (UEMOA), Moussa Leko, (ECCAS) and Stefanie Lang (Legacy Landscape Fund). They will speak to the importance of assessing regional biodiversity strategies and exploring synergies across Africa regional blocks. The panellists will examine the different biodiversity strategies being implemented to foster complementarity.

After the panel's presentations, the audience will participate in groups to discuss questions posed by the moderator. What next for biodiversity conservation in Africa? What are key reforms needed to unlock the opportunities in biodiversity conservation in Africa? How can we create enabling environment to unlock the opportunities linked to biodiversity conservation?

COVID-19 and Pandemics – Parallel Theme Workshop

19 July, 16:00-17:30, Room T3

cT-1 Cross-cutting Theme Parallel Session: Impacts of COVID-19 and other pandemics in PCAs

Session Manager: Samuel Kasiki

Samuel Mwanda, Director Uganda Wildlife Authority (UWA,), as moderator will introduce the subject and moderate the Panel which will focus on the impacts of COVID-19 and pandemics on PCAs. Alain Liva Raharijaona (Fondation pour les Aires Protégées and la Biodiversité de Madagascar) will deliver the keynote address «La COVID-19 a exacerbé les menaces and les pressions sur les ressources naturelles de Madagascar. Comment la pandémie affecte les priorités and les besoins de financement des aires protégées?»

Three panellists: Paula Boixeda (Autonomous University of Barcelona/ Frankfurt Zoological Society, Germany) will discuss COVID-19 in the context of increasing global and interconnected crises, that call for resilience in PA governance and management. Bennett Kahuure (Namibia) will share how the Conservation Relief, Recovery and Resilience Facility (CRRRF) mobilises resources to provide relief to CBNRM institutions affected by Covid-19, and ensure the continuation CBNRM activities such as anti-poaching, mitigation of human wildlife conflict, conservation of natural resources and the management of wildlife to minimise job losses in the sector. This is an example of Namibia's stakeholder collaboration. Ademola Ajagbe (Regional Managing Director, Africa Region, TNC) will share Share TNC's establishment of the Africa Wildlife Conservancies Crisis Fund in response to the covid-19 pandemic that provided critical on the ground support to community rangers. While Lydia Amah (Director of Forest Resources, Ministry of Environment and Forest, Togo) will discuss The perspective of Togo on impact of the pandemics in Protected and Conserved Areas.

Participant group discussions will focus on questions posed by the moderator: How prepared are PCAs for current and future pandemics? How can PCAs that depend on the industries most affected by pandemics (tourism, health, etc) cope with these impacts? How can effectively managed, well-connected PCAs help with resilience against pandemics?

$day \overline{3}$ **Leadership Dialogue Plenary**

Wednesday 20 July

Wednesday 20 July, 8:30-10:00, KCC Auditorium

Leadership Dialogue Plenary: Investing in biodiversity: Diversifying innovative financing models for PCAs.

Session Manager: Kathy MacKinnon, Support Staff: Andrea Athanas and Ademola Ajagbe

This Leadership Dialogue will bring development partners and CEOs of International NGOs together to discuss and make suggestions as to how global cooperation can be improved and better achieved and provide a critical overview on investments in conservation. Questions such as what the impact has been? the challenges and what needs to be done differently could be responded to by the panellists.

The moderator, Charlotte Karibuhoye, Head of Strategic Alliances and Director, MAVA Foundation, will introduce the session with keynote addresses by:

1. Paulo Gomes, Co-founder, New African Capital Partners, Former Executive Director at the World Bank

The panellists include:

- Hon. Claudine Uwera, Minister of State in charge of Economic Planning, Rwanda Hon. Steffi Lemke, Minister for the Environment, Nature Conservation, Nuclear Safety and Consumer Protection. Aurelia Micko, Director of Environment, Kenya and East Africa USAID Mohamed Imam Bakarr, Lead Environmental Specialist GEF 3
- Carsten Sandhop, Head of division Governance and Natural Resources Southern African Region, KfW. Chantal Marijnissen, Head of Unit in charge of Environment, Sustainable Natural Resources,
- 6. 7
- 8 Alain Liva Raharijaona, Executive Director of Madagascar Fund

Video: Carlos Manuel Rodriguez, CEO and Chairperson of the Global Environment Facility

This will be followed by an open question and answer session and a concluding summary by the moderator

Parallel Stream Plenaries Agenda for Wednesday 20 July 10:30-17:00

Wednesday 20 July, 10.30-12.00, KCC Auditorium

Stream 1 Parallel Plenary - Promoting effective and equitable networks of PCAs ST-4 in Africa

Session Manager: Philip Muruthi

Panel 2: Achieving more effectiveness through connected and complimentary networks of PAs and OECMs

Margaret Kinnaird (moderator, WWF) will introduce the discussion as to whether we should be talking about expanding PAs while effectiveness of existing PAs is low and OECMs are not considered? Madhu Rao (IUCN, WCPA Secretariat) will provide the key note address and share experiences on conserving 30% of the planet and with commitments to 30x30 from over 70 countries, including the G7. President Biden, the European Union and at least 15 countries on the African continent.

Hon. Mme. Louopou Lamah (Minister of Environment, Guinée Conakri) will provide one keynote address on the vision for the renewal of Guinea's protected area network. This announcement is a precursor to the COP15 announcement.

There will be three panellists: Kerry Jo Purnell (Wilderness Foundation Africa; South Africa), Nombe Ganama (Mali Elephant Project), Bennet Kohuyu (Namibian conservancies), Joseph Lekealem (Director, Parks and Wildlife, Cameroon) and Dr. Mwakilema (TANAPA). They will share cost-effective mechanisms of PA expansion to achieve the 30x30 target. Successes and lessons learnt will include how targets are met elsewhere. This is based on the need for protecting half of Earth's land and seas, and the important milestone of 30% by 2030. The discussion will address the need to consider how states can develop and mobilise the capacity to meet these targets. If countries support and achieve an ambitious, multi-dimensional target along these lines, they need to be supported to catalyse their own knowledge and skills but also be equipped with tools and resources to achieve and measure progress. Exploring opportunities and priorities for community conserved areas and initiatives to scale up coverage, impact, and community benefits across Africa and its most important conservation landscapes will be the focus, including a case study from the Mali Elephant Project. TANAPA will share perspective from the PA Authorities on the expansion 30X30 and OECMs.

Following inputs by the panel, the audience will break into groups to discuss such questions as: Is it about 30x30 or more about supporting more of what we have? How can we achieve 30% in a cost-effective manner that brings community conserved areas together with other actors at national level? How to ensure that conservation is truly effective and embraces quality? What lessons are being learnt and what actions are needed?

3.30-10.00

HL-4:

Wednesday 20 July, 14.00 – 17.30, KCC Auditorium

sT-5 Stream 1 Parallel Plenary - Promoting effective and equitable networks of PCAs in Africa

Session Manager: Philip Muruthi

Panel 3: Other Effective Area-based Conservation Measures (OECMs) - can they fill the gap?

Panel 3 will be moderated by Trevor Sandwith (IUCN) who will introduce OECMs and how they contribute to effectiveness, equity, connectivity, and representation. Joe Watson will provide a TEDx onbroadening our goals: How understanding urbanization and future trends can help Africa's PA's and OECMs

Five panellists: Daniel Marnewick (IUCN), Gordon Ajonina (Cameroon Wildlife Conservation Society), Charles Doumenge (CIRAD), SVatosoa Rakotondrazafy (President Board of Directors, Madagascar), and Francis Okalo (IUCN), will discuss needs for more marine PAs, and share experiences of the management and business plan development process for Cameroon's first marine national park in Central Africa. Africa's traditional, spiritual and cultural values contribute to area-based conservation and are essential to achieve management objectives at national, regional and global levels. This will bring stakeholders in charge of conservation and land use planning to better understand the differences and complementarities between PAs and "conservation" areas. But this requires improved policies and legal frameworks to help secure communities' rights and collaborating with them to be in charge of sustainable management of their resources and ensure effectiveness of the management measures they adopt. OECMs allow for the inclusion of rights-holders and stakeholders who contribute to conservation through area-based conservation outside formal protected areas, including IPLCs.

Participant, in groups, will address questions such as: How can community conserved areas be respected and recognized as OECMs? How can we increase the importance of marine conservation contribution to OECMs? What is the role of conservation on private lands, agricultural lands or other lands/areas in government control, etc.?

Wednesday 20 July, 10:30-12:00, Hall MH1 st-6 Stream 2 Parallel Plenary – People: Championing community-led conservation in Africa

Session Manager: Fiesta Warinwa

Panel 2: Sustaining Community Conservation: The Need for New Funding Models and Practices

Panel 2 focuses on the need for innovative funding to ensure community conservation success, as there is more funding available. But to thrive and spread, and deliver on communities' expectations and opportunities, these initiatives by grassroots organizations have unique funding needs and face barriers that can deprive them of resources. Local organizations can struggle to access funding, particularly from larger development agencies or international funders, due to logistical, cultural, linguistic, legal and administrative barriers. Communities and their supporters across Africa need to rethink existing conservation funding, including more longer-term, flexible, organization supportive funding for community-led initiatives at scales that promote accessible funding for local organizations.

Fred Nelson (Maliasili) will introduce and moderate this session. John Kamanga (SORALO) as keynote speaker will articulate the overall situation with current funding models, the challenges faced and some of the opportunities available to bring about transformation in practice. TEDx speaker, Rashid Sumaila (Campaign4Nature), will venture into the specific challenges of financing the implementation of OECMs, and how this will impact local communities and their willingness to support governments as they strive to implement the 30x30 target.

Panel two attempt to address such challenges through an overall articulation of the situation and its barriers; highlighting the opportunities for international funding; exploring national efforts to date; demonstrating the power of collaboration to deliver at the landscape level and, lastly, the session will highlight opportunities for micro-enterprise and finance generated at the most local level. Daniel Sopia (MMWCA) will share experiences with bringing funding of international donors to the local level, highlighting recent experiences with COVID-19 relief and recovery efforts. Tapiwa Makiwa (CCF/NA) will speak of the collaboration between government, NGOs and communities in establishing a trust fund to support the needs of communities. Damien Bell (Honeyguide Foundation) will share experiences in building financial sustainability into models designed to deliver conservation at the landscape level. Examples of the value of small-scale enterprise and possibilities for local financing will be shared. Patrick Kimani (Coastal and Marine Resource Development) will share local efforts of the Eco-credits finance model, which is a demonstrated, yet still uncommon, approach that provides access to finance and improves the livelihoods of coastal communities, while conserving marine resources at the most local level will be profiled.

The audience will then discuss questions, including: What are some of the new funding models & practices (being discussed or in practice) that could get more funding to "the point of impact" on the ground? What barriers currently exist and what needs to fundamentally change to allow these new models and practices to be more pervasive and more successful? How can we drive towards greater financial self-reliance at the community level?

Wednesday 20 July, 10:30–12:00 and 14:00–17:00 Room T1 st-7 Stream 3 Parallel Plenary – Biodiversity: Unlocking the opportunities linked to biodiversity conservation

Session Manager: Youssouph Diedhiou

Panel 2: Effectiveness of Biodiversity conservation strategies in Africa

Ali Kaka (IUCN Councillor, Kenya) will moderate this panel. There will be a keynote address by Frank Turyatunga (UNEP Africa Representative), Hon. Viriato Luís Soares Cassamá (Minister of Environment, Guinée Bissau), and the 5 panellists are: Charlotte Karibuhoye Said (Mava Foundation, Senegal), Muhtari Amiu Kano (CEO, Nigerian Conservation Foundation, Nigeria),), Julieta Kabera (DG, Rwanda Environment Management Authority, TBC) and Roman Eyholzer (Porini Foundation, Switzerland). They will discuss how coastal and marine resources can be naturebased recovery processes, show how inclusive strategies can tackle the biodiversity crisis, discuss strategies for effective PAs management, planning and expansion, and financing for PAs, with links to sustainable financing cross-cutting theme. After the panellists have made their brief presentations, the audience will, in groups, discuss such questions as: What do we need to do differently to grow in a way that does not compromise the very basis of our economics? How can we improve our understanding of biodiversity for economic development? What actions are needed? What are the key lessons?

Wednesday 20 July, 14:00-15:30, Room T2

CT-2 Cross-Cutting Theme Parallel Workshops – Protecting the protectors – supporting rangers for improved effectiveness of the PCA management

Session Manager: Samuel Kasiki

The moderator will be Amon Koutoua (International Ranger Foundation, Africa). Olga Biegus (Universal Ranger Support Alliance) will provide a keynote address to understand competences needed in the ranger sector and support its professionalization, through presenting the Universal Ranger Competences framework. The moderated panel of Patricia Malasha (USAID Integrated Land and Resource Governance Program, Zambia), Andrew Campbell (Game Rangers Association of Africa, South Africa), Drew Mcvey (WWF, Kenya), and Marianne Kettunen (Thin Green Line Foundation UK) will share experiences on a). Women's engagement in PA management being side-lined and marginalized, but a new set of tools can provide tangible ways to bring women back to the centre of PA management, b). It is important rangers, PA and conservation management authorities and those who support rangers financially understand the role of ranger associations; c). Build awareness of the challenges facing rangers and support their role in ensuring the effective management of PCAs; and d). PCAs can provide a major contribution to deliver the 2030 SDGs. Rangers are 'key workers' to help to deliver these benefits and their role needs to be better recognized – and supported. So, what is the most important driver to keep rangers dedicated, capable, motivated on the job?

After the panellists have made their brief presentations, the audience will, in groups, discuss such questions as: What is the most important driver to keep the frontline warriors (RANGERS) dedicated, capable, motivated and in the job? What are the major changes, obstacles to the career of Game Rangers? What would be transformative, a game changer in the future of capacity for rangers in Africa?

day 4 **Leadership Dialogue Plenary** Thursday 21 July

Thursday 21 July, 8:30-10:00, KCC Auditorium HL-4 Leadership Dialogue – Upholding rights, promoting good governance and equity

Session Manager: Charles Oluchina; Support Staff: Edwin Tambara

There will be a Leadership Dialogue on "Upholding rights, promoting good governance and equity" in terms of a) good governance and protecting rights, b) approaches to implementation of these principles c) experiences of challenges faced by international NGOs and IPLCs and what they have learnt about governance for the future. There will be discussions on bow to address historical injustices of conservation, and recommendations for the future d). how to foster respectful relationships between INGOs and CSOs.

The moderator will be Hon. Emmanuel Ugirashebuja, Minister of Justice and Attorney General, Republic of Rwanda.

- There will be two keynote addresses on "Upholding rights and promoting Equity" by:
- Hon. Collins Nzovu, Minister of Green Economy and Environment, Zambia Solange Bandiaky-Badji, Global Coordinator of Rights and Resources Initiative, RRI, and President of the Rights and Resources Group, Senegal 1. 2.

There will be a panel with the following panellists:

30-10.00

0.30-13.00

- Lucy Mulenkei, Executive Director, Indigenous Information Network () Jimmiel Mandima, Vice President IFAW 1.
- Jennifer Mohamed-Katerere, Independent Human Rights and Environmental Law Expert Brian Child, IUCN Regional Councilor
- 4

Video: Francisco Cali Tzay, UN Special Rapporteur on Human Rights and Indigenous Peoples ()

This will be followed by a question-and-answer session and a concluding summary by the moderator

Cross-Cutting Theme Agendas for Stream 1 (21-22 July) in Parallel

Thursday 21st July 10:30-12:00, KCC Auditorium

Cross-Cutting Theme-1 Parallel Workshop: Governance and PCAs: Governance CT-3 mechanisms to safeguard biodiversity and PCAs in Africa

Session Manager: Tanva Merceron (IUCN)

Title: Models of managing PCAs: Co-Management, delegated management, privately managed PAs, conservancies and IPLCs: What are we learning from governance for effective management, and what tools to use

The moderator, Jennifer Kelleher (IUCN) will provide an introduction on the diversity of management models of PCAs. Paul Ouedraogo will provide a keynote address on Placing Protected and conserved areas governance in the African context.

The panel of six experts: Rogers Lubilo (Community Livelihoods Network) and Phil Franks (IIED), Dr Paul Scholte (GIZ, Ivory Coast), Dr Fortunata Msoffe (Ministry of Natural Resources and Tourism, Tanzania), Rio Heriniaina, ONG des Guides d'Andasibe, (Madagascar) and Patricia Mupeta-Muyamwa (Africa Integrated Landscapes Strategy Lead, TNC) will share examples. Participatory management of PAs and their conservation and development activities will be discussed based on different participatory models. West and Central Africa have 15 years of experience in delegating management of its PAs to private partners. Challenges face Wildlife Management Areas (WMAs), particularly for wildlife protection. Increasing human population threatens their existence, with pressures to forego protection and let people have land for agriculture, and how we Make Local communities in the center of conservation to have successful impact.

After the panellists have made their presentations, the audience will, in groups, discuss questions: What are we learning from different types of protected and conserved area governance arrangements? How can this be improved? What key actions are needed for effective and fair decision making? We know that diverse and well governed protected and conserved areas leads to better outcomes for both people and nature. What are some examples of diverse conservation actors and decision making? How can these be best recognized? What challenges do they face and what kind of support is needed?

Thursday 21 July, 10.30-12.00, Room T3

CT-4

0.30-12.00

Cross-Cutting Theme-2 Parallel Workshop: Climate Change and PCAs: Securing a climate resilient future for nature and people in and around PCAs in Africa

Session Manager: Harisoa Rakotondrazafy

Title of Session: The PCAs we want in Africa under a changing climate

The moderator who will introduce the session is Alice Ruhweza (Regional Africa Director, WWF) while Hon. Amit Idriss (Minister of Water, Forest, Hunting and Fisheries, CAR) will deliver the keynote address focusing on shaping the role of protected areas as global strategy for adaptation and mitigation to secure resilient future for nature and people in Africa and ahead of COP 27 in Egypt.

There are 6 panellists David Obura (Executive Director, CORDIO, East Africa), Wendy Foden (Head of Science at the Cape Research Centre, South African National Parks and Chair of the IUCN Species Survival Commission's Climate Change Specialist Group), Joyce Jefwa (IUCN Commission on Ecosystem Management), Annah Agasha (Forest Stewardship Council, Uganda), Sarah Walker (Regional Carbon Advisor), and Harisoa Rakotondrazafy, WWF Africa Climate Change Adaptation Coordinator.

They will speak on: managing coastal and marine ecosystems in protected and conserved areas for increased resilience and blue carbon in Africa. ; the role of the IUCN SSC's Climate Change Specialist Group's work and the need to increase the number and size of PAs to build ecosystem resilience to climate change; how nature-based solutions represents an opportunity for the Biosphere Reserves to increase their contribution to achieve climate adaptation and mitigation goals; how does certification of Protected Areas could be an innovative tool to for climate mitigation and adaptation; sharing lessons from REDD+/carbon sequestration in the management of protected areas and innovative needed for increased NbS benefits for mitigation and/or adaptation and the need for a regional strategy for climate change and PAs to drive more impactful actions in Africa.

After panellists have made their presentations, the audience will, in groups, discuss questions such as: What role can PandCAs play to address climate impacts, how their role as NbS for climate could be valued and upgraded What innovative strategies and transformative solutions are required (in terms of knowledge, policy, finance, and implementation)? What bold commitments should be taken during APAC that will feed the CBD, UNFCCC and UNDRR agendas?

Thursday 21 July, 14.00-15.30, KCC Auditorium

Cross-Cutting Theme-3 Parallel Workshop: Conflict and PCAs: Resolving resource use conflicts as a pathway to security and conservation within and around PCAs

Session Manager: Christian Noirard

Title of Session: Human wildlife conflicts: from conflict to co-existence

The session will be moderated by Winnie Kiiru (Elephant Protection Initiative,), and Nyamukondiwa Fidelicy (Fauna and Flora Zimbabwe) will make a keynote presentation on the current state of play on human wildlife conflicts: from conflict to co-existence.

Four panellists will share experiences: Barbara Chesire Chabaga, Benjamin Y Bassono (Executive Director of Guardian Angels of Nature in Burkina Faso), Atutonu Amah (Director of Forest Resources in Togo), and Abdel-Aziz Baba Moussa (Centre National de Gestion des Réserves de Faune, Benin).

With the growing impact of climate change on biodiversity in Tanzania and Africa, human wildlife conflicts (HWC) are expected to rise and demand more robust and sustainable solutions. Monitoring of elephants in Benin with collars reduces human-wildlife conflicts, when it is combined with information, communication and education including the application of the regulations in force.

After panellists have made their presentations, the audience will, in groups, discuss such questions as: how do we go from conflict to co-existence? What solutions are there for PCA managers, local leaders and local communities?

CT-5

CT-6

14.00-15.30

Thursday 21 July, 14:00-15:30, Room AD12

Cross-Cutting Theme-4 Parallel Workshop: STIK and PCAs: How science, technology and indigenous knowledge (STIK) contributes to the management and effectiveness of PCAs

Session Manager: Florence Palla

Title of Session: Science and indigenous knowledge for conservation in Africa with respect to PCAs.

Prof. Egwim Evans (Centre for Genetic Engineering and biotechnology, Federal University of Technology, Minar, Nigeria) will moderate the session, and Prof Dr Sir Assogbadjo Ephrem (University of Abomey-Calavi and IUCN-SSC- Crop Wild Relative Specialist Group Regional Leader for Sub Saharan Africa,) will make the keynote on why science, technology, and traditional knowledge are important for PA and biodiversity management?

There will be a moderated Panel with Souleymane Jules Gaye (Nitidae, Burkina Faso), Magatte Diaw (Association Nationale des APAC du Sénégal), Prof David Miller (Millar Institute for Transdisciplinary and Development Studies, Ghana), and Chris Zganjar (Natural Climate Solutions Information Specialist, TNC).

They will share experiences on village organization and social and income-generating activities in the Ponasi Project in Burkina Faso for better cohesion and conservation and increased resilience. Learning from the support project in Senegal for the ICCA of Lac de Guièrs and revive the Dekkal Dekh river, we can promote biodiversity and reduce conflict between breeders and farmers. We can have HWC systems that are more human-centred, and culturally sensitive. Connecting PCAs to ecological networks can ensure long term viability, sustainable development and improved wellbeing but this is a challenge. We explore connectivity, innovations to accelerate this work, how sectors (agriculture to infrastructure) are part of the solution, and look to opportunities to capitalize on to secure a connected and resilient Africa for nature and people.

TNC will explain how they have used scientific analysis of climate and key informant surveys to understand the impacts of climate change on community livelihoods to ensure that human responses to climate change did not negatively impact biodiversity and supported livelihoods.

After panellists make their comments, the audience will, in groups, discuss such questions as: How can we facilitate community organizational development to promote natural resources conservation? How do you promote an alternative framework for coexistence of communities and their wildlife/natural resources in Africa? How do you promote science and technology and indigenous knowledge to facilitate sharing of innovations in natural resources conservation in Africa?

Friday 22 July, 10.30-12.00, Room MH1

CT-7

Cross-Cutting Theme-5 Parallel Workshop: Sustainable Finance and PCAs: Financial resilience and sustainability are key for long-term success of Africa's PCAs

Session Manager: Sue Snyman

Title of Session: Tools for innovative financing to secure Africa's biodiverse land and seascapes

Charlotte Karibuhoye (Mava Foundation) will moderate, while Candice Stevens (Wilderness Foundation Africa and IUCN WCPA Financing Group Co-Chair) will make the keynote address on financing versus funding; business plans; tools available and their use. Sue Snyman (ALU SOWC) will give a TEDx talk on their new Wildlife Economy Investment Index.

Five panellists: Karen Price (Consortium of African Funds for the Environment), Kathleen Fitzgerald (Global Wildlife Program, World Bank), Amrei von Hase (Wildlife Conservation Society), Ellane van Wyk (Wilderness Foundation Africa), will share experience about tools for innovative financing of PCAs, CTFs, CMPs, offsets and fiscal instruments (e.g., tax incentives). It will be an interactive panel discussion.

After panellists make their comments, the audience will be engaged through an interactive Q and A session

Friday 22 July, 10.30-12.00, Room AD11

CT-8

10.30-12.00

10.30-12.00

Cross-Cutting Theme-6 Parallel Workshop: Infrastructure and PCAs: Reducing the impact of physical infrastructure on ecosystems and biodiversity in key Africa landscapes

Session Manager: Lucy Waruingi

Title of Session: Planning for infrastructure with appropriate safeguards

The moderator, Sarah Chiles (EL/GZT, Kenya) will introduce the session. Mohamed Bakarr (GEF Lead Environment Specialist) will make a keynote address to highlight ties with GEF-8, which focuses explicitly on transportation infrastructure.

There will be a moderated panel of 3 experts: Adam Ceesay (Wetlands International Africa Côte Occidentale Golfe de Guinée), Lucy Waruingi (African Conservation Centre, Kenya), and Benneth Nicholas (Government of Sudan). They will share experiences on practical methods to reduce the impact of infrastructure on biodiversity, and highlight challenges and opportunities in striking a balance between conservation and development. The findings of a survey on Africa's PAs - an analysis of the current trends of impacts of infrastructure on PAs, will be shared. The PAs in South Sudan and the need to develop the infrastructure for biodiversity management.

After panellists make their comments, the audience will discuss questions in groups: What are the minimum guiding principles that should inform development in protected and conserved areas? What is required to adopt the mitigation hierarchy in designing and planning for mega infrastructure projects.

day 5 Leadership Dialogue Friday 22 July

HL-5	Friday 22 July, 8:30-10:00, KCC Auditorium Leadership Dialogue – Climate Change and the Biodiversity Nexus			
	Session Manager: Imen Meliane; Support Staff: Charles Karangwa, Sharize Odongo			
	There will be a Leadership Dialogue on PCAs at the centre of the "climate and Biodiversity nexus". The discussions will focus on the message that PCAs should be a first choic for NBS and how that can be carried forward in climate discussions. It will explore what would it mean for Africa and the planet to lose existing carbon sink ecosystems, and the urgency to protect them. The need for PCAs to adapt and help people adapt to climate change will be highlighted.			
8.30-10.00	The session will be Moderated by Imen Meliane, Regional Councillor Africa, IUCN. Key note address will be given by: 1. David Obura, CEO CORDIO East Africa			
	There will be a panel with the following panellists: 1. Hon Jeanne d'arc Mujawamariya, Minister of Environment, Rwanda			

- Hon Beatrice Anywar Atim, Minister of Environment, Rwanda
 Hon Beatrice Anywar Atim, Minister of State for Environment, Uganda
 Hon. Aissata Daouda Diallo, Minister of Environment and Sustainable Development, Mauritania
 Elizabeth Wathuti Environment and Climate activists, Kenya
 Hindou Oumarou Ibrahim, Coordinator of the Association of Peul Women and Autochthonous Peoples of Chad
- This will be followed by an open question and answer session and a concluding summary by the moderator

Cross-Cutting Theme Agendas for Stream 2 (21-22 July) in **Parallel**

Thursday 21 July, 14:00-15:30, Room T2

CT-9 Cross-Cutting Theme-1 Parallel Workshop: Governance and People: Governance mechanisms to safeguard biodiversity and PCAs in Africa

Session Manager: Tanya Merceron

Title: Strategies for people centered conservation, a zoom on female leadership: High Level dialogue of female leaders on Environment in Africa

The moderator will be Tanya Mereceron (IUCN) who will provide the introduction. Solange Bandiaky - Badji, (RRI) will deliver the keynote address on What gaps? Paving a path forward for Indigenous and community women leaders in conservation

Three female ministers will be on the panel: Hon. Amah Louopou (Ministre de l'environnement de Guinée), Hon. Aissata Daouda Diallo (Ministre de l'environnement de Mauritanie) and Hon. Rosalie Matondo (Ministre de l'Economie forestière du Congo). They will be joined by 4 other experts: Juliet Kabera (DG of Ministry of Environment of Rwanda), Charlotte Karibuoye, (Fondation MAVA), Jennifer Mohamed – Katerere (Independent Human Rights and Environmental Law Expert), and Hindou Oumarou Ibrahim (, Association for Indigenous Women and Peoples of Chad, AFPAT). The panellists will share experiences on the importance of gender and women in conservation.

How do the managers of PCAs take into account user rights recognized for women? Political commitments is likely to promote greater involvement of women in conservation We need to identify the different roles of women and men vis-a-vis biodiversity: responsibilities, priorities and knowledge that affect how individuals use and manage biodiversity. The mechanisms put in place in Mauritania to strengthen the capacities of women, enable them to carry out conservation responsibilities effectively. This should include the importance of the right to land, and women's traditional knowledge. Conservation is not a "male only" world. Women and men use nature differently and have similar and different governance structures in terms of use, access and the institutions responsible. There will be a focus on the themes of rights, justice and power in protected and conserved areas. It reflects on advances for IPLC and social-ecological resilience, and hones in on the urgent (transformative) changes needed to move from rhetorical goals for rights to the realisation of rights for vulnerable and marginalised people.

Some suggested ideas for framing and questions: Women and girls interact in a different way to natural resources than men, they often collect water, gather wild resources and are at most risk when access to these resources is prevented through restrictive conservation practices. This session will seek to answer the following questions: How do PCAs affect women and girls specifically? Are there specific gender-based risks that need to be considered? How are the rights of women and girls be safeguarded at the local level?

How can women be recognized as key decision makers in the conservation of nature?

Thursday 21st July, 16.00-17.30, AD12

Cross-Cutting Theme-2 Parallel Workshop: Climate Change and People: Securing a climate resilient future for nature and people in and around PCAs in Africa

Session Manager: Harisoa Rakotondrazafy

Title of Session: The interactions of climate change on people living adjacent to and within PCAs

The Moderator will be Nikhil Advani (WWF Director, Climate, Communities and Wildlife and Lead of climate change survey in Africa), who will provide an introduction. Hindou Oumarou Ibrahim (co-chair of the facilitative Working Group of the UNFCCC IPLC platform, Member of Indigenous People of Africa Coordinating Committee) will deliver the keynote address focusing on putting IPLCs to drive climate knowledge and locally led climate solutions around PCAs and ensuring co-benefits for nature and people.

There are five panellists: Chris Zganjar (Africa Biodiversity Collaborative Group), Aby Drame (Enda Tier Monde), José Américo Filipe and Noel Valentino (ACADIR, Angola), Olusegun Michael Ogundele (Nigerian Youth Biodiversity Network) and Patrice Bigombe (Research and Action Centre for Sustainable Development in Central Africa Cameroon). They will share experiences on the Global Change Impacts group of the ABCG which is documenting how communities are impacted by climate change, how they respond, and how their responses affect their livelihoods and biodiversity, and recognize the contribution of climate knowledge from indigenous peoples. Case of vulnerability and adaptation to climate change in and around marine protected areas (MPAs) in Senegal, and how climate change affects marine and coastal communities and ACADIR's work to establish climate resilient conservation agriculture around Luengue Luiana National Park in Angola resulted in increased yields and improved livelihoods will be also shared. The use of indigenous and local knowledge as well as the recognition of their importance for mitigation and adaptation measures will be highlighted and discussed.

After panellists have made their presentations, the audience will, in groups, discuss such questions as: What are the potential climate impacts on people? How have people responded to changes in climate and what does the implications for PCAs? How IPLCs are contributing to climate knowledge? What can we learn about adaptation and mitigation actions that involve IPLCs and what could be improved?

Friday 22 July, 10:30-12:00, Room AD12

CT-11

0.30-12.00

0.30-12.00

Cross-Cutting Theme-3 Parallel Workshop: Conflict and People: Resolving resource use conflicts as a pathway to security and conservation within and around PCAs

Session Manager: Christian Noirad

Title of Session: Food production and healthy ecosystems: Conflicts between farmers, pastoralists and wildlife

The session will be introduced by the moderator Dr Fungo Bernard (National Agricultural Research organization, Uganda), and the keynote address will be made by Dr. Christian Noirard (PA and Biodiversity Coordinator IUCN)

There will be 3 panellists: Florent Zowoyo (Country Director, WCS-CAR), Aaron Kalala Karumba (APAA Congo, Association Paysanne pour l'Autosuffisance Alimentaire, DRC), and Masegeri Rurai (Frankfurt Zoological Society, Tanzania).

They will focus interventions on: Pastoralism and conflict in northern CAR; How agroforestry helps protect biodiversity, and provide critical but declining habitats which reduces animal-human conflict is presented. Protecting pastoralists and pastures bordering PAs through improved livelihood based on healthy rangelands, healthy livestock and healthy people.

After panellists have made their presentations, the audience will, in groups, discuss such questions as: What should be done to improve food production growth without affecting biodiversity? What needs to be done to avoid conflicts between farming and pastoralism? How can farmers and pastoralists co-exist with wildlife?

Friday 22 July, 10:30-12:00, KCC Auditorium

0.30-12.00

0.30-12.00

Cross-Cutting Theme-4 Parallel Workshop: STIK and People: How science, technology and indigenous knowledge (STIK) contributes to management effectiveness of PCAs

Session Manager: Florence Palla

Title of Session: Science and IK for Conservation in Africa with respect to rural men and women

The session will be moderated by Prof. Georg Nyamadewo (University of Zimbabwe). Prof. David Millar (President of Millar Institute for Transdisciplinary and Development Studies, Millar Open University, Ghana,) will make the keynote address on what does science and IK tell us about conservation with respect to rural men and women.

There will be a moderated Panel with Christophe Ishalenge (EMERGENCE, DRC), Patrice Bigombe (Centre de Recherche and d'Action pour le Développement Durable en Afrique centrale, CERAD, Cameroon), Malih Ole Kaunga (IMPACT-PARAN Alliance, Kenya), and Américo Nhanga Walanse Sanhá, Maimuna Jaló e Elena Bersacola (l'Institut de la Biodiversité and des Aires Protégées – IBAP, Guinea-Bissau,).

They will explore the role sustainable natural resources management of the Itombwe massif plays in DRC, based on integrating rights, traditional practices of local and indigenous communities. It is necessary to recognize the importance of indigenous climate knowledge, to integrate it into public policies to combat climate change. Strengthening inclusive conservation of land and natural resources in N. Kenya by facilitating solutions tailored to the context, conceived and run by indigenous people is sustainable. We seek to strengthen and sustain values of inclusive conservation through networking for learning, sharing and empowerment. Such initiatives depend on the strength of the communities. Improving knowledge of biodiversity and human-wildlife interactions can be useful in improving public health by increasing resilience to zoonotic epidemics.

After panellists make their comments, the audience will, in groups, discuss such questions as: How can we integrate science and IK to enhance conservation for community resilience? How can we integrate traditional knowledge on climate change into public policy? How can STIK contribute to promoting inclusive solutions to conserve natural resources? What could be the role for STIK to promote biodiversity for addressing the challenges of pandemics?

		10.00 10.	00 D	4.040
l nursda	v 21 July	, 10:30-12:	UU. KOOI	n AD12

CT-13 Cross-Cutting Theme-5 Parallel Workshop: Sustainable Finance and People: Financial resilience and sustainability are key for long-term success of PCAs

Session Manager: Sue Snyman

Title of Session: Building financial resilience for communities and their conserved areas

The session, moderated by Holly Dublin, (IUCN ESARO and Maliasili) who will introduce the importance of building community financial resilience, and Patience Gandiwa (ZimParks) will make the keynote address the need to diversify revenue streams to build sustainability and resilience. While Terence Hey-Edie (UNDP/GEF) will discuss the contributions of the GEF/UNDP Small Grants Programme

An interactive discussion panel with Alain Liva Raharijaona (Foundation for Protected Areas and Biodiversity of Madagascar), Samson Obiene (CORDIO) and Fred Nelson (Maliasili). They will speak briefly on CTFs in Madagascar, innovative community financing and getting funding/finance to the communities on the ground.

After panellists make their comments, the audience will be engaged through an interactive Q and A session

Thursday 21 July, 16:00-17:30, KCC Auditorium Cross-Cutting Theme-6 Parallel Workshop: Infrastructure and People: Reducing CT-14 the impact of physical infrastructure on ecosystems and biodiversity in key African landscapes

Session Manager: Lucy Waruingi

Title of Session: Sustainable infrastructure for increased benefits to local communities

The moderator Munira Bashir (Kenya Director, TNC), will introduce the session. Two keynote speakers, Arona Soumare (AfDB) and Hon. Jean Luc Assi (Minister of Environment and Sustainable Development, Cotê d'Ivoire) will discuss AfDB infrastructure investment in Africa and how they engage local communities in design and benefits in constructionsthe session; and how Government plans on infrastructure plans, and how does the Government investments in infrastructure incorporate local people's priorities and long-term benefits

6.00-17.30

There will be a moderated panel with 3 experts: Hitesh Mehta (HM Design, USA), Scott Edwards (Conservation Strategy Fund, USA), and Ahmed Senhoury (PRCM, Senegal). They will speak about the value and examples of participatory master planning for sustainable tourism and highlight approaches to ensure sustainability for local livelihoods and biodiversity. Leaders are grappling to promote economic development and reduce poverty while prioritizing the conservation of Africa's unique natural resources. The Conservation Strategy Fund's capacity-building program provides policymakers and conservationists as to how to use economics to identify solutions that make it possible to have a healthy and strong economy while safeguarding the environment. The session will share on financing sustainable infrastructure for sustainable development – provisions by development finance. Stakeholders engagement in the development of infrastructure along the coast line in West Africa marine region, including mining and fisheries value chain will be shared.

After panellists make their comments, the audience will, in groups, discuss questions: What are the lessons learned from countries which implemented guidelines for sustainable infrastructure? At which level are financing institutions following "green guidelines" that also include benefits for local communities?

Cross-Cutting Theme Agendas for Stream 3 (21-22 July) in Parallel

Friday 22 July, 10:30-12:00, Room T1

cT-15 Cross-Cutting Theme-1 Parallel Workshop: Governance and Biodiversity: Governance mechanisms to safeguard biodiversity and PCAs in Africa

Session Manager: Tanya Merceron

Title: Role of IPLCs in PCA management and biodiversity conservation

Nianogo Aimé will moderate the session and Patrick Kipalu (RRI) will deliver the keynote on Tenure and Beyond: The Effective Way to Achieving the 30x30 Goals".

There will be 4 panellists providing short commentaries including: Susan Canney (Mali Elephant Project, Wild Foundation, Mali-UK), Alpha Amadou DIALLO (Greentransformation2050, Guinea), Emmmanuel Nuesiri (IUCN-NRGF), and Maguette Diaw (Président de l'association nationale des aires et territoires du patrimoine communautaire – APAC - du Sénégal), and Alpha Diallo (Green-transformation2050 Guinea).

They will share experiences on how to make local communities the centre of conservation, draw the attention of decision-makers and managers to the effective beneficial involvement of communities living in and around PAs and emphasize gender in local governance, and accountability as rights in natural resource governance. The governance of PAs based on community surveillance, and integrating community monitors into PA monitoring is important. We will show how the Pygmies', through images, reconcile conservation with the interests of local people on the borders of a PA, and show how local communities contribute to sustainable management of natural resources of Haut Niger National Park. The conservation of this PA cannot be effective without community participation. OECMs could be a solution for recognizing this role but there are constraints.

After the panellists have made their presentations, the audience will, in groups, discuss such questions as: What is the role of IPLCs in conservation? What lessons can we learn and what actions are needed? How can we better respect IPLC cultural values of biodiversity?

Thursday 21 July, 16.00-17.30, Room AD12

Cross-Cutting Theme-2 Parallel Workshop: Climate Change and Biodiversity: Securing a climate resilient future for nature and people in and around PCAs in Africa

Session Manager: Harisoa Rakotondrazafy

Title of Session: The impact of climate change on biodiversity and paradigm shift to manage for change

The moderator, Wendy Foden (Head, Science at the Cape Research Centre, South African National Parks and Chair of the IUCN Species Survival Commission's Climate Change Specialist Group) will introduce the session. Hon. MIGUEL MBA NSANG MIKUE (Minister Delegated of Agriculture, Forests and Environmmet, Guinée Equatorial) will deliver one keynote address on how the Government responds to the challenges of biodiversity management & climate change in Africa and what paradigm shift is needed to manage change. While Mohamed Bakarr (GEF Lead Environment Specialist) will make the second keynote and explain how GEF funding could support increasing the resilience to climate change of biodiversity in Africa, and how to unlock more transformative climate funding to support the biodiversity agenda

There are 4 panellists: Kevin Coldrey (Environmental Policy Research Unit, UCT, South Africa), Harison Andriambelo (Wildfowl and Wetlands Trust, Madagascar), Benedictus Freeman (Technical Advisor for the U.S Forest Service International Programs, Liberia), and Isingizwe Honorine (Young Volunteers for the Environment, Executive Director, Rwanda).

The current and potential future distributions of West African biodiversity in response to global climate and other environmental changes will be shared. From youth perspectives, what bold commitments are needed to address the climate impacts on biodiversity in Africa?

After panellists have made their presentations, the audience will, in groups, discuss such questions as: What are the current and potential impacts of climate on biodiversity? what do these impacts mean for conservation and PCAs? How can we build the resilience of biodiversity within PCAs? What bold commitments are needed to secure Africa biodiversity under changing climate?

10.30-12.00

CT-17 CT-17

Session Manager: Christian Noirad

Title of Session: Conflicts between PCAs and IPLCs

Gloria Ujor (Africa IUCN Councillor, Nigeria) will moderate, and Emmanuel Sulle, (ICCA Consortium, South Africa) will introduce the challenges conservation is facing as a moment of reckoning, with growing pressures to address human rights (HR) violations in the name of conservation and to support IPLCs who are resisting harmful industries in their collective lands and territories of life. This keynote will speak to power at this moment of reckoning and call on APAC to rise to the challenge of new directions for equitable conservation in Africa.

10.30-12.00

CT-

10.30-12.00

18

Four panellists will share experiences: Patrice Bigombe (CERAD, Cameroon), Quintino Tchantchalam, e Dr Alfredo Simao da Silva (Instituto da Biodiversidade e das Areas Protegidas, Guinea-Bissau), Sahailou Samaila (Fauna Director Environment Minister - Niger), and Salatou Sambou (coordinator of KAWAWANA CPA – Senegal).

Approaches to conservation based on respect for HR is becoming a reality in Central Africa, by using social and safeguard policies and implementing memoranda of understanding amongst IPLCs. There are challenges in conservation approaches based on respect for HR, e.g., integrating this into policies for managing PAs. The role of MPA governance structures and the different actors involved in conflict resolution will be explored through sharing Guinea-Bissau's experience in conflict resolution. Relationship between neighbouring communities in transboundary situations (Niger, Benin Burkina-Faso) will be shared, as well as an example of a model of human-PA conflict resolution through community protected areas. This session will engage participants to advance rights-based approaches to area conservation relevant to the needs of Africa.

After panellists make their comments, the audience will, in groups, discuss such questions as how can HR abuses be addressed by PCA managers and local authorities? What systems should be put in place to eliminate conflicts between PCAs?? How should the central government ensure zero tolerance to HR abuses?

Thursday 21 July, 10:30-12:00, Room T1

Cross-Cutting Theme-4 Parallel Workshop: STIK and Biodiversity: How science, technology and indigenous knowledge (STIK) contribute to management effectiveness of PCAs

Session Manager: Florence Palla

Title of Session: Science and IK for conservation in Africa with respect to biodiversity

Prof Kwame Frimpong (Cape Coast University Ghana,) will introduce the session as to what can science and indigenous knowledge do for sustainable biodiversity management. Dr Samson Gwali (National Agriculture Research organization, Uganda,) will deliver a keynote address.

The panel will be Egwim Evans (Federal University of Technology, Nigeria,), Aissa Regalla de Barros (Institut de la Biodiversité and des Aires Protégées - IBAP; Guinea-Bissau,), and Chifundera Kusamba Zacharie (Universite Pedagogique Nationale DRC).

Research in coastal areas needs to be explored by Africans, and research networks should focus on young researchers to develop products from coastal resources. The importance of mollusc resources in the Bijagós community will be highlighted. Molluscs are a sedentary whose exploitation raises questions about the coastal environment including mangroves and water quality. It is important to improve knowledge relating to the biology and ecology of key species, in terms of their distribution area, biological cycles, which can be used to determine the limits and optimal conditions of exploitation. Herpetological diversity indices are a reliable and verifiable scientific means for identifying priority sites for conservation.

After panellists make comments, the audience will, in groups, discuss questions: What could be the role of universities in STIK in conserving Africa's biodiversity? What could be the role of traditional knowledge initiatives in fostering the conservation of PAs? How can STIK improve monitoring and protection of biodiversity in PAs in the next 10 years.

Thursday 21 July, 14:00-17:30, Room MH1

CT-19

14.00-17.30

CT-20

Cross-Cutting Theme-5 Parallel Workshop: Sustainable Finance and Biodiversity: Financial resilience and sustainability are key for long-term success of PCAs

Session Manager: Sue Snyman

Title: Show me the money: Sustainable financing for PCAs in Africa

The session will be moderated by Edwin Tambara (AWF), and David Ombisi, UNEP, African Union - Green Stimulus Programme will make the keynote address on finance for biodiversity as Africa's natural infrastructure. Roman Eyholzer (Porini Foundation) will make a TEDx-talk on nature collectibles - blockchain technology (Seychelles).

There will be a moderated panel by Pauline Nantongo (ECOTrust) with Peter Katanisa (NCA COP), Sue Snyman (ALU SOWC), and Marie Suzanna (RAMPAO). They will speak on natural capital, wildlife economy and promoting and strengthening the financial sustainability of marine and coastal biodiversity conservation in West Africa

A second panel moderated by Kathleen Fitzgerald on 'Demystifying Carbon' where Mike Korchinsky (Wildlife Works in DRC) will provide a recorded interview on Trends in REDD+ and the carbon market. Other panellists include Roland Hunter (Southpole), Jonas Syapze (WWF) and James Kairo (Kenya Marine and Fisheries Research Institute). They will focus interventions on nature-based projects and barriers and opportunities to accessing carbon finance, the landscape of Trinational Dia, Odzala and Minkebe (TRIDOM, Gabon, Congo and Cameroon), community engagement in REDD+, and mangrove carbon (Mikoko Pamoja Kenya).

After panellists make their comments, the audience will discuss questions on conservation finance, natural capital; finance for marine biodiversity, REDD+, emerging financial technologies (Blockchain, NFTs); and wildlife economies

Thursday 21 July, 10:30-12:00, Room T2

Cross-Cutting Theme-6 Parallel Workshops Infrastructure and Biodiversity: Reducing the impact of physical infrastructure on ecosystems and biodiversity in key African landscapes

Session Manager: Lucy Waruingi

Title of Session: Resilient landscapes: ensuring no net-loss of biodiversity due to infrastructure

The moderator, Adam Sessay (Wetlands International, Senegal) will introduce the session and Frank Turyatunga (UNEP Africa Representative) will give a keynote address on "Futures thinking for Africa related to linear infrastructure" and questions such as How Africa should plan for its economic development, with the aim of meeting the SDGs and the aspirations of its people without compromising the sustainability of it's natural resources. While the temptation to grow now, clean up later is huge, Africa also being careful to protect its environmental assets against overexploitation. What models do we need to generate value and direct benefits to local communities and balance/reverse the ongoing biodiversity loss

0.30-12.00

There will be a moderated panel of 3 experts: Amrei Von Hase (WCS), Demba Marico, PRCM, Senegal), Li Wenqi, (CRBC, China, Rwanda Office), and Lucy Waruingi (ACC). They will share experiences as to how COMBO demonstrates implementation of effective mitigation and offset policies reduce harm to nature and support progress towards national contributions to global targets. Balancing nature and development can generate finances for investment in PA management and support sustainable growth. Partnerships for conserving coastal areas and the sea can help sustainably manage marine biodiversity and coastal areas using the proxy of environmentally sensitive areas. Connectivity conservation, and innovations are accelerating this work as to how sectors from agriculture to infrastructure are part of the solution, and will look ahead to the crucia opportunities we need to collectively capitalize on to secure a connected and resilient Africa for nature and people. The session will look at what safegurads and guidelines are there to protectd habitats and migratory routes and ensure no net-loss to biodiversity as a results of the constructions projects in Africa

After panellists make their comments, the audience will discuss questions: What future scenarios for landscapes and seascapes can be predicted? Which policies needed to be put in place to ensure sustainable landscapes?

Stream Concluding Session: Key Recommendations, Actions and Challenges – Friday 22 July 14:00–17:00

Friday 22 July, 14:00-17:00, Stream 1-KCC Auditorium; Stream 2-MH1; Stream 3-T1 Stream Wrap up sessions to summarize key messages, actions and recommendations

Session Managers: Helena Motta & Edmund Barrow; Moderators: Stream Leaders/2 Thematic Leaders each

- Each Stream Session moderated by Stream leads. Each stream receives reports from Cross-Cutting themes, relevant side events and pavilions. In advance each stream agrees on a series of questions to address (concerning recommendations, action points, learning, for example): What are the key action points and recommendations? What are the key things that have been learnt? What key challenges have been identified? Each table or group of about 20 participants discuss and summarize their responses to these questions 14.00-2. 3. 15.30

 - 4.
- 16.00-Agree on the key components of the Stream Reports Small drafting team develop stream reports (evening of Friday 22 July and morning of Saturday 23 July) 17.00

day 6 **Plenary Closing Day** Saturday 23 July

Saturday 23 July, 8:30-17:00, KCC Auditorium **Closing Plenary and Report Back**

Co-Moderators: Luther Anuker and Fred Kumah

Managers: Tanya Merceron and Charles Karangwa

Report back and Closure:

8.30-12.00

14.00-17.00

- Festival organized by Kigali
 Finalize Stream Report back preparation
 Final discussions and Agreement on Kigali Action Plan by working group

- Introductory remarks by Master of Ceremonies
 Stream 1 Report Back (10 min) Stream Leaders
 Stream 2 Report Back (10 min) Stream Leaders
 Stream 3 Report Back (10 min) Stream Leaders
 IPLC statement on Commitments and Actions
 Youth statement on Commitments and Actions
 Reading & Ratification by acclaim of Kigali Call to Action by the Minister of Environment Rwanda

- Closing remarks by:

 1.
 Kaddu Sebunya CEO AWF

 2.
 Bruno Oberle Director General IUCN

 3.
 Hon Jeanne d'arc Mujawamariya, Minister of Environment, Rwanda

Delegates Depart evening of 23 July, or on 24 July, or go on tourism trip

THE CLOCK IS TICKING

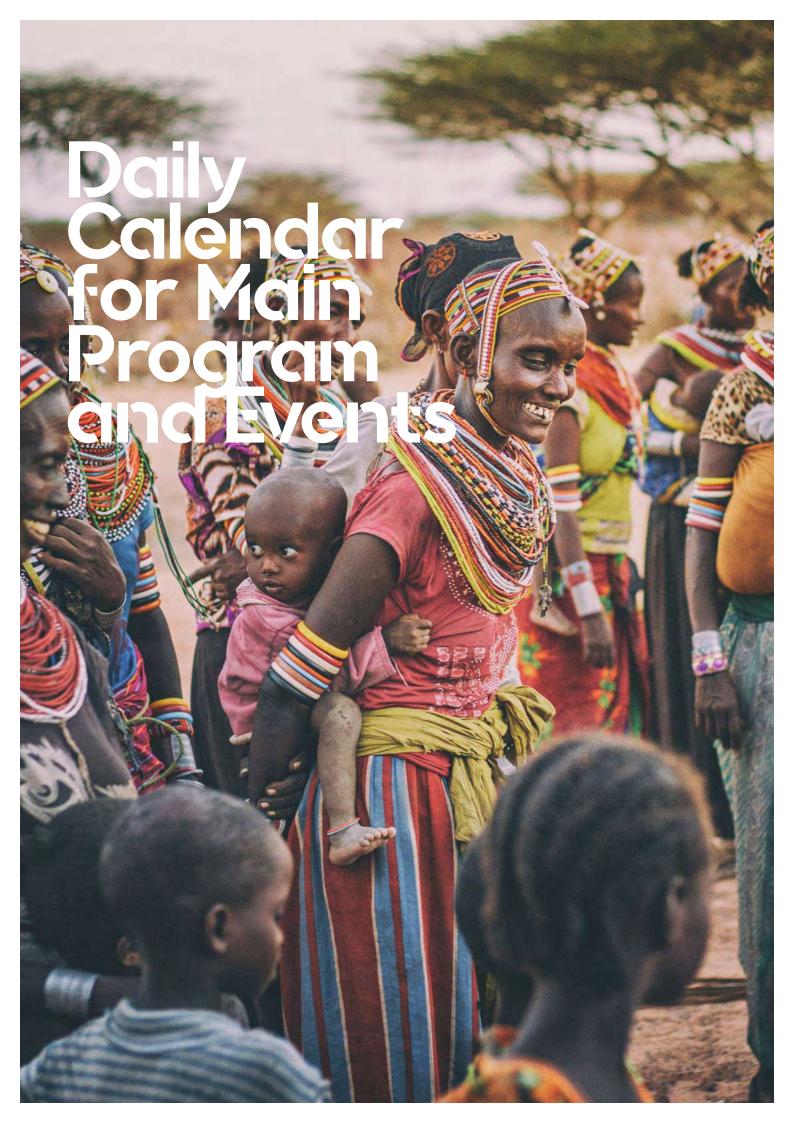

Africa has a long and special relationship with nature. Now, more than ever, Africa is leading the world to a bold future where nature and development go hand in hand.

WWF is proud to be part of that future. For 60 years, WWF has championed for nature and people, and we continue to believe a better future is possible. Together.

- . In 1963, WWF funded a pioneering college in Tanzania for protected areas management training;
- . In 1972 WWF led a fundraising campaign to buy land around the world-famous Lake Nakuru National Park in Kenya,
- In 1986 Cameroon's Korup National Park is established with WWF support, one of the first to include local people in the planning process;
- In 1990 WWF partnership with leading civil society and government start the CBRNM (community based natural resource management programme) in Namibia
- In 1998 WWF set up a programme in the Central African Republic to enable gorilla tourism and research in Dzanga Sangha National Park
- In 2021 WWF pioneers partnership with AWF, Africa YMCA and Africa Scouting Association to set up the Top 100 Young Conservation Leaders award.

To learn more about our work and meet our partners, join us at the Panda Hut

Daily Calendar for Morning of Wednesday 20th July Stream Plenary Day

	8.30-10.00	10.30-12.00	12.00-14.00
Audit. (2,500)	Leadership Dialogue: Investing in Biodiversity: Diversifying innovative financing models for PCAs. (LS), (T), (HL-4)	Stream 1 Panel 2: Achieving more Effectiveness through connected and complementary networks of P&CA and OECMs (LS), (T), (ST-4)	Clinic: IUCN Green List to recognize & increase the number of PCAs effectively & equitably managed, deliver conser- vation, & achieve social & economic objectives. (Thierry Lefebvre; IUCN, 056-PCA-GOV (1)
MH1 (400)	Clinic : Expérience de la finance climatique au Gabon, Con go & Cameroun dans le paysage TRIDOM sera partagée. Les discussions qui suivront permettront au bassin du Congo devrait envisager ses modalités propres de mobili- sation de la finance climatique. (Jonas KEMAJOU SYAPZE; WWF, Cameroun) 047-PCA-BIO-PEO-CC-SUF (2)	Stream 2 Panel 2: Sustaining Community Conservation: The Need for New Funding Models & Practices (LS), (T), (ST-6)	Workshop: USAID & partners share experience (Mozam- bique, Madagascar, DRC & Zambia) to help conservation practitioners, governments & donors appreciate interna- tional development potential of PCAs (X102, Tobiason) (1)
T1 (400)	Workshop: To achieve 30x30, countries need sustain- able finance. This can assist countries achieve 30x30 target with sustainable outcomes. (Ellane van Wyk; The Sustainable Landscape Finance Coalition; South Africa) 011-PCA-SUF (2)	Stream 3 Panel 2: Biodiversity: Unlocking opportunities linked to biodiversity conservation (LS), (T), ST-7)	Clinic: Will equip PA practitioners with knowledge & guid- ance to implement conservation finance tools to support the conservation. (David Meyers, USA; 017-PCA-SUF) (1)
T2 (400)	Workshop: Engaging & empowering youth in conservation in Zambia & Namibia. Lessons on how to engage youth in community conservation & to prepare them on how to be key players in the field. (Thandiwe Mweetwa; Zambian Carnivore Programme; Zambia) 074-PCA-BIO–STIK (2)	Vorkshop: Rangers work in positions of trust. Protection of human rights is one responsibility to ensure best practice is followed relating to protecting human rights of rangers & those they interact with. (Andrew Campbell; Game Rangers Association of Africa) 082-PCA-GOV (1)	Clinic: Small-scale gold mining is a growing economy. Economic tools, such as the Mining Impacts Calculator, can help the sector move to more sustainable practices. (Scott Edwards; USA; 019-PEO-GOV) (2)
T3 (400)	Clinic : Echanger avec Mme Florence Palla & M Philippe Mayaux sur l'opportunité de couvrir le premier congrès des parcs africains qui se tiendra ; L'idée est d'organiser un rayonnement multi régional africain des sujets & problématiques développés sur le congrès. (Magrina, 002- PCA-GOV-CC-CONF-SUF (2)		Clinic: Interactive workshop to help individuals, conserva- tion entrepreneurs, enterprises & organizations identify business opportunities within conservation challenges they are passionate about. Session will create awareness of why there is need for diversified approaches to con- servation efforts & the advantages of business-oriented approaches. (Richmond-Coggan; ALU; 006-PEO-SUF (1)
AD1 (70)	Clinic: APAC with practical examples of importance of disease interventions to recover endangered species & sustain livelihoods. (Kirsten Gilardi, 003-BIO-STIK) (2)	Clinic: Land stabilization in 6 landscapes. Importance of different PCAs for sustainable development. (ENDAMANA DOMINIQUE 056-PCA-BIO-GOV (3)	Café: Indigenous conservation knowledge resilient & need to weave Indigenous worldviews with western knowledge in science & practice. (Tamufor Emmanuel; Canada) (#332) (2)
AD2 (50)	Training Campus: Practical Approaches to Conservation, Com	amunities & Enterprise. X69/X70 (merged, Vorhies) (2)	Clinic: Enhance role of women in conservation of Grevy Zebra - In Ethiopia & Kenya. (TOLERA NEGESA, 001-PEO- GOV-SUF) (3)
AD3 (30)	Clinic : L'association de l'apiculture & de l'éduction envi- ronnementale permet de garantir de meilleurs revenus aux riverains de la source d'eau & la durabilité de nos actions. (MOUSSA Maliki ; 001-BIO-CC) (2)	Café: Explore Outreach social trips & communities (X34, Karanja) (2)	Clinic: Culture traditionnelle est l'ensemble des créations émanant d'une communauté culturelle fondées sur la tra- dition, exprimées par un groupe ou des individus et recon- nues comme répondant aux attentes de la communauté en tant qu'expression de l'identité culturelle et sociale de celle-ci (BETOULET José Martial; Association Ndima-Kali; CAR), 104-PEO-BIO-STIK (2)
AD4 (60)	Workshop: Shift from a high to practical level discussion on TBI, IFAW host governments implementing this. Speak- ers share successes & challenges & importance of part- nering with local communities. (Phillip Kuvawoga; IFAW; Zimbabwe) 099-PCA-PEO-GOV-BIO-CC-CONF-STIK (1)	Save Our Species African Wildlife grants for CSOs working on threatened species & sustainable development. High- light grants to address challenges of communities & how actions complement PA management. (Anne Mugo; IUCN, Kenya) 005-PEO-CONF	Café: Lessons for donors: opportunities of securing land for conservation in Africa. Impact of private PCAs beyond Ha bought & protected. Experiences from 20 years IUCN NL Land Acquisition Fund partners in Africa & lessons learned from Latin America will be shared. (Frederique Holle 059-GOV) (1)
AD11 (80)	Clinic: To conserve 30% by 3030 need to shift from exclusionary to inclusive conservation. session will outline concepts & practices leading to stronger community governance including "village companies." (Brian Child; 004-PEO-GOV (2)	Clinic: PANORAMA's 1000+ solutions case portfolio - importance of PCAs for development (Aissa Traore IUCN; Switzerland), 018-PCA-GOV-STIK (3)	Clinic: Fire management & C2 sequestration in Kafue Na- tional Park, Zambia through collaborative fire management & sharing best practices for PCAs & replicate the tools in Africa. (Irene Muthuka, 016-PCA-BIO-CC-STIK) (1)
AD12 (300)	Workshop : Un panel des différents acteurs de différents pays de l'Afrique de l'Ouest avec différents experts suivi d'un brainstorming sur les enjeux actuels & futures de la problématique de conservation des tortues marine (001-BIO-GOV-STIK, Gueye) (3)	Workshop: Pan-African Conserv.Trust (A-PACT) sus- tainable financing deliver development agenda 2063, & ensure PCAs provide ecosystem services & development (Indekhwa Anangwe; X32) (1)	Clinic: Will enable African political leaders & decision mak- ers to discuss themes & messages compiled from sus- tainable use events & sessions at APAC by African youth leaders, IPLC, & conservation experts. (Katie MacKenzie; Jamma International, England), 022-PEO-GOV (3)
Radisson Blue room	Clinic: Share information & experiences on impact of ener- gy infrastructure on wildlife; Share lessons on approaches to mitigate impact of energy infrastructure on wildlife (Alex Ngari 007-BIO-CONF-INFRA) (3)	Café: How Namibian Gov., communities & NGOs record wildlife numbers, poaching, wildlife& human-wildlife conflict. Africa conservation success, & draw on lessons. (Bennett Kahuure 011-BIO-GOV-STIK) (3)	Clinic : Programme de Suivi Ecologique du WWF pour le bassin du Congo a été conçu pour être intégré dans la gestion quotidienne des APs afin d'accompagner la mise en oeuvre des (N'GORAN, 041-PCA-BIO-GOV-STIK (3)
AD6	Kigali Call to Action Group meeting room		

Daily Calendar for Afternoon of Wednesday 20th July Stream Plenary Day

	14.00-15.30	16.00-17.30	18.00-20.00			
Audit. (2,500)	Stream 1 Panel 3: Other Effective Area Based Conservation audience round table (group) discussion on key questions (L		IUCN WCPA International Ranger Award ceremony SHARMA Ruchir (1)			
MH1 (400)	Workshop: 3 proposals - Co-management, community cons ecological & social pillars. 3 case studies from WWF-Kenya tion Society (Cameroon) & Noé (Niger) show how managing Harouna, Niger, 012-PEO-GOV; Yussuf Wato, WWF, Kenya, 0 Cameroon Wildlife Conservation Society, 023-PCA-PEO-BIO-	(Madagascar & Mozambique), Cameroon Wildlife Conserva- PAs & wildlife benefits conservation & people. (Abdoulaye 73-PCA-PEO-GOV-CONF-SUF-STIK; & Leonard Usongo;	Clinic: Learn about the EU-AU NaturAfrica initiative for conservation & development in key landscapes of Africa. (Mayaux Philippe; European Commission; Belgium) 095-PCA-BIO-PEO-GOV (1)			
T1 (400)	Stream 3 Panel 2 continued: Biodiversity: Unlocking the opportunities linked to biodiversity conservation; & audience round table (group) discussion on key questions (LS), (T), (ST-7 ctd)	nities linked to biodiversity conservation; & let's put funding in hands of the people who know PAs of best. How can we integrate IPLCs into PA management cu				
T2 (400)	Theme Parallel Workshops – Protecting the protectors – supporting rangers for improved effectiveness of the PCA management. (LS), (T), (CT-2)	Workshop: Experiences & innovative finance improve conservation in PAs through increased access to clean cooking & lighting. Stakeholder network in PAs share on sustainable Renewable Energy financing. (Simon Peter Weredwong; WWF Uganda) 083-PCA-PEO-CC-SUF (2)	Workshop: Need Standard integrated approaches for PAs in Nigeria to balance growth, food security & envir. pro- tection. (Sonigitu Asibong Ekpe; Ministry of Environment; Nigeria 058-PCA-BIO-CC (1)			
ТЗ (400)	Workshop: COMBO assists governments, business & civil society integrate biodiversity in policy to improve con- servation outcomes following infrastructure. Understand how this supports economic development & biodiversity policy to meet targets. Experiences with stakeholders define good mitigation policy, & implement programs to avoid impacts on biodiversity & contributions to Global Biodiversity Framework. Amrei von Hase, WCS, X81 (3)	Strengthening inclusive & just conservation of natural resources in N. Kenya by facilitating solutions tailored to context, conceived & run by Indigenous People is sustainable. Strengthen & sustain values that embody inclusive conservation by networking for mutual learning, sharing & empowerment. Inclusive conservation depend on the strength of the communities themselves (Malih Ole Kaunga, IMPACT-PARAN Alliance, Kenya) 002-PEO- GOV-CC-CONF-STIK (2)	Clinic : La protection de la nature requiert une prise de conscience collective de toutes les communautés mais aussi les générations futures & gestionnaires publics dans tous les niveaux de la prise de décision. Cela passe par une éducation environnementale adaptée. (Ei hadramy Ahmed Deida ; Parc National du Banc d'arguin ; Mauritania) 052-PCA-GOV (2)			
AD1 (70)	Workshop: PAs contribute to livelihoods & resilience. But there are inadequate resources & governance for man- agement. Mountain ecosystems receive little attention despite their critical roles (FULTON U. MANGWANYA, 007- PCA-PEO-BIO- GOV-CONF-SUF-INFRA (1)	Clinic: Share experience on successful multistakeholder collaboration along East Atlantic flyway for the conser- vation of migratory birds & a call for development to join in cooperation for the benefit of birds & people. (Geoffroy Citegest, 006-PEO-GOV (3)	Clinic: Rhino conservation to move beyond survival, sus- tainability & create conditions for life to thrive. Lessons emerging from rhinos provide insights into integrating human & nature, & innovative ways to leverage support for Africa's well-being within & beyond protected areas. (Dr Mike Knight, IUCN SSC African Rhino Specialist Group, Zambia) X16 (3)			
AD2 (50)	Training Campus: Capacity-building for policymakers & cons healthy strong economy & safeguard the environment. 002-	vervationists on use of economics to identify solutions for 3IO-INFRA (Edwards) (1)	Clinic: Appreciate people & ensure sustainable habitat management of Ecosystems of Atewa - insights to secure forest for water, biodiversity & resilience using advocacy. (Daryl Bosu; A Rocha Ghana) X50 (2)			
AD3 (30)	Clinic: Marine Mammal Management Toolkit & MPAs. We will promote toolkit & encourage its use. (Thomas Dallison 025-PCA-GOV) (3)	Clinic : Echanges d'expériences avec les autres Etats sul la gestion de la faune. (NGOUMBANGO, 011-PCA-GOV (3)	Film: How Gorongosa National Park in Mozambique is renewing the vision of a national park. Food and beverag- es at 6pm. Screening followed by Q&A. (020-PCA-GOV, Byrne) (1)			
AD4 (60)	Training campus: lintroduce participants to an innovative, in advancing natural resource governance in Africa. 40 particip	clusive, & credible approach to assessing, strengthening, ants, 005-PEO-GOV (Nuesri) (2)	Workshop: Different use of natural capital empower conservation "Stewards of nature benefits". 2 cases dis- cuss vision for conservation as societal. (Ulrike Troeger, Augustin Berghoefer; Helmholtz Center for Environmental Research; Germany) X77 (2)			
AD11 (80)	Clinic: BIODEV2030 - a science approach underlying key steps for Biodiversity threats assessment & multi-stake- holder dialogue for voluntary sectoral commitments (009-BIO-GOV-STIK, Deschamps)) (3)	Workshop: Conservation & development not mutually exclusive. Unlocking & diversifying Africa's wildlife economy provides benefits at local & national levels, & ensures wildlife seen as a key strategic asset that should be invested in (Sue Snyman 020-PCA-PE0-SUF) (3)	Media & Film: Storytelling - powerful tool to engage audiences & save wildlife. Showcase Wildlife Warriors Season 2, to encourage people to reverse current trends detrimental to wildlife. (Dr Paula Kahumbu, Wildlife-Di- rect), 016-BIO-CC-STIK (3)			
AD12 (300)	Workshop: Learn how PA co-management - Collaborative Management Partnerships (CMP) catalyze management effectiveness, finance & community benefits, & the CMP Toolkit, & hear from PAAs, NGOs, & donors. (Kathleen Fitzgerald,, World Bank, Washington) 002-PCA-SUF (1)	Workshop: Human rights-based approaches & integratio ² in wildlife & PA management, institutional ownership in conservation, & capacity building of policy makers. (BIGOMBE LOGO Patrice; CERAD; Cameroon; 059-PCA- GOV) (2)	Garner interest & share lessons from Human-Wildlife Conflict Insurance Scheme with aim of adoption & up- scaling to other countries that experience HWC & raising funds for consumer education about proposed insurance scheme. (Barbara Chesire- Chabbaga, AB Consultants Ltd, Kenya) 001-PEO-CONF-SUF (2)			
Radisson Blue room	3	Workshop: Identify places for biodiversity, inform development, PCAs. Expansion to 30% in places of importance for ecosystems & contribute to halting biodiversity loss. (Simeon Bezeng, South Africa 014-BIO-STIK) (1)	Clinic: Provision of water to wildlife is critical in drough periods in Protected Areas. Finding solutions to climate change in ensuring effective biodiversity conservation. (Jeremiah Chakuya; Zimbabwe Parks & Wildlife Manage- ment Authority) 106-PCA-BIO-GOV-CC (1)			
AD6						

Daily Calendar for Morning of Thursday 21st July Cross Cutting Theme Day

	8.30-10.00	10.30-12.00	12.00-14.00
Audit. (2,500)	Leadership Dialogue: Upholding rights, promoting good governance & equity (LS), (T), (HL-5)	Cross-cutting theme 1: Models of management of PCA: Co-Management, delegated management, privately managed protected areas, Conservancies & IPLCs: (LS), (T), (CT-3)	Workshop: Strengthen human rights of IPs & their protection in World Heritage Sites & PAs. Inclusive conservation' & ways to recognize Indigenous Peoples & their rights. (Kanyinke Sena; The Indigenous Peoples of Africa Coordinating Committee (IPACC); Kenya (2) (T)
MH1 (400)	La gestion déléguée permet au vu de l'expérience de African Parks Networks de mieux assurer la conservation de la biodiversité dans les parcs nationaux. (OROU Augustin; Direction générale des Eaux, forêts & Chasse; Benin) X46) (1)	Cross Cutting Theme 3: Conflicts between Protected & Conserved Areas & IPLCs (LS), (T), (CT-17)	3 Clinic: How WABiLED counters illegal wildlife trade West Africa & will showcase how criminal networks thrive through illegal access (X101 Kelleher) (3)
T1 (400)	Workshop: Join ESRI technical workshop to learn about ArcGIS Solutions for Conservation & experience the pow- er of ArcGIS for PCA management (X103, Smetana) (1)	Cross Cutting Theme 4: Science & IK for Conservation in Africa with respect to Biodiversity. (LS), (T), (CT-18)	Clinic: 30 mill. tons C2 p.a. across 30 million acres. Benefit 3 mill people by 2030; Results will put success of a REDD+ impact model on global map & be a key opportunity (Chloe Evans, BioCarbon partners, BCP) 044-PCA-PEO-CC-SUF (2)
T2 (400)		Cross Cutting Theme 6: Resilient landscapes: Ensuring no net-loss of biodiversity due to infrastructure. (LS), (T), (CT-20)	Café: Shift in tigerfish fishing policy & how it should be done - results provide evidence for policy to make tigerfish fishing catch & release. (TERENCE MAGQINA 010-BIO-STIK (3)
T3 (400)	Workshop: community-based participatory monitoring to generate information on status of resources & ensure full participation of local communities in managing their resources. (Evelyne Ndiritu, CORDIO East Africa; Kenya) 019-BIO-STIK (2)	Cross Cutting Theme 2: The PCAs we want in Africa under a changing climate (LS), (T), (CT-4)	Workshop: "Importance of Networks of MPAs including LMMAs" (Eng): X82 (Kendyl Wright): 092-PCA-GOV (Purifi- cació Canals); 094-PCA-GOV (Charles Janje) (1)
AD1 (70)	Workshop: BirdLife partnership will showcase success stories & lessons regarding vulture safe zones, their governance & their impact to promote further regional collaborations for the betterment of biodiversity & people (Chandra, 031-PCA-GOV-CONF-INFRA) (3)	Workshop: Restoring mangroves to mitigate climate change & enhance livelihoods. Deliver community, conservation, & climate change benefits & conserve mangroves, strengthen communities (Deborah Vorhies; African Wildlife Economy Institute (AWEI), Stellenbosch University, England) X67, X71 (3)	Clinic: Future of conservation lies with its people, & we need to maximize returns on investments. Ecological monitoring provides PCA management decisions with data to show change for unlocking finances, & informa- tion gathering for sustaining livelihoods. (Andrew Whitley, Wildlands Conservation Trust) 007-PEO-STIK (2)
AD2 (50)	Café: With state-of-the-art technologies, the latest geospatial datasets, & the right methods, the benefits of protected area management can be assessed, quantified, & scaled-up. Learn how land use/land cover mapping & multi-criteria analysis can be applied in your region of interest! (MARIAPPAN Muneeswaran, IUCN, Switzerland 013-PCA-STIK (1)	Clinique: Comment peut-on convaincre les secteurs et les parties prenantes non liés à la conservation de son importance ? On va discuter les approches de la con- servation pour inclure le capital naturel et démontrer les possibilités des analyses capital naturel à l'exemple de trois aires protégées africaines différents. (Ulrike Tröger ; UFZ, Elias Huland ; GIZ ; Allemagne) X20 (3)	Clinic: To protect migratory species in Africa, PAs are one component. Ensuring connectivity & safe passage between subpopulations must be a priority to maintain & ensure healthy & resilient ecosystems across the regions. (Dr. Jimmiel Mandima; IFAW) 100-PCA-PEO-BIO- GOV-SUF (3)
AD3 (30)	Clinic: Future of mining needs a strong sustainable development "balance Sheet" to ensure mining mainstreams women, & mitigates impacts. Health of the balance sheet is subject to elimination of barriers to women & destruction of biodiversity. (Janet Adeyemi 018-PEO-BIO-CC) (1)	Café: Climate change results in devastating effects in Africa. Need to examine degradation & role it plays in climate change. Share & fund restoration, agree on roles of government & stakeholders, & the future of restoration projects, & sustainable use of land. (Charles Batte, Ugan- da 015-BIO-CC) (2)	Cafe : Les laridés : un bioindicateur pour l'évaluation de la ressource halieutique au Banc d'Arguin. (Yacouba Diakhité, Parc National du Banc d'Arguin, Mauritania) 017-BIO-CC (3)
AD4 (60)	Training Campus: Éducation Environnementale : rôles des le Education - roles of religious leaders, environmentalists & th		Workshop: Re-evaluate how PAs & tourism can be man- aged in disasters, through restructuring conservation through collaboration, engagement & technology. (Daph- ine Madhlamoto; Zim Parks) 107-PCA-BIO-SUF (1)
AD11 (80)	Workshop: PAWs as effective engines for growth & conservation. Purpose of PAs, & metrics of success need understanding including socio-economic values. (Brian Child, 004-PCA-GOV-SUF (1)		Clinic: Shares experience on successful multi-stakehold involvement in managing a MPA, & shows a model of governance that can be replicated with similar challeng- es. (Berta Renom; Spain, 046-PCA-GOV) (1)
AD12 (300)	Workshop: Equitable governance of PCAs key to comba loss. Equip rightsholders of PAs & 0ECMs with tools for governance, equity, & share lessons (Eneya M'simuko; Zambia Community-based Natural Resources Manage- ment Forum), 065-PCA-GOV (1)	Cross Cutting Theme 5: Building financial resilience for communities & their conserved areas (LS), (T), (CT-13)	Workshop: Facing the future & rapid changes, engaging MPAs managers in a "getting to resilience" process (English & French workshop) (Jean-Jacques Goussard; EU program Ocean Governance - IUCN CEM; France 013-PCA-GOV-CC (1)
Radisson Blue room	Café: ILCN facilitates land owners, stewards, & local communities to conserve private lands. Networks exist in Australia. We hope to raise awareness of ILCN & assess interest to grow a network working on private & civic land conservation in Africa. (Mike Mwangi 063-PEO-BIO-GOV-CC-SUF) (2)	Campus: Will showcase Land-Use Planning Training Methodology designed by ABCG, including use of exercis- es to raise awareness, build connections with potential trainees or course facilitators, & promote course to improve land-use planning skills across Africa. (Kendall Jones 007-BIO-GOV (2)	Café: Will identify measures to restore coastal shark pop ulations applicable in the Western Indian Ocean (Osuka CORDIO, Kenya; 026-PCA-GOV-CONF) (3)
AD6	Kigali Call to Action Group meeting room		

Daily Calendar for Afternoon of Thursday 21st July Cross Cutting Theme Day

	14.00-15.30	16.00-17.30	18.00-20.00
Audit. (2,500)	Cross Cutting Theme 3 Resolving Resource Use Conflicts a Path to Security & Conservation in & around PCAs (LS), (T), (CT-5)	Cross Cutting Theme 6: Sustainable infrastructure for increased benefits to local communities (LS), (T), (CT-14)	Workshop : Térnoignages d'un représentant congolais a une ghanéene & à la diffusion de 2 vidéos de 6 minutes, nous verrons l'application de la gestion communautaire d'aires protégées permet d'obtenir des résultats concrets autant du point de vue de la conservation que du développement local. (ESTEVE Paul; Comité français de l'UICN; France) 067-PCA-GOV (2)
MH1 (400)	Cross Cutting Theme 5: Show me the money: Sustainable F	inancing for PCAs in Africa (LS), (T), (CT-19)	La société civile, spécialisées sur l'application des lois environnementales peuvent valablement accompag- ner les gouvernants dans la gestion durable des AP & l'application des lois & stratégies Africaines de gestion durable des ressources naturelles. (Josea S. DOSSOU BODJRENOU; NATURE TROPICALE Benin) X39 (T)
T1 (400)	Clinic: Upper Guinea Forests are transboundary & are complex for conservation-management, requiring reconciliation of visions, objectives, processes, policy instruments, & partnerships (X100, Kelleher) (2). From 13.00 to 15.30	Workshop: Positive efforts to recognize & support IPLC collective lands & territories of life through policy & law, & engage on experiences, & opportunities for improve- ment, including shifts to pluralism. (Emmanuel Sulle; ICCA Consortium; South Africa) X52 (2)	Film: Inspire engagement & catalyse Behavior change, break language barriers & conserve traditional & indigenous knowledge. (Nashipae Orumoy, AWF); 005-PEO-STIK (2)
T2 (400)	Cross Cutting Theme 1: Strategies for people centered cons	servation, a zoom on female leadership (LS), (T), (CT-9) (2)	Café: How conservation enterprises enhance conser- vation, climate, community, & benefits in PAs. (Frank Vorhies; African Wildlife Economy Institute (AWEI), England 013-PCA-SUF)(1)
ТЗ (400)	Workshop: MPAs as tools for adaptation & resilience against CC" (Fr): 012-PCA-CC (Marie Traore); 012-PCA- CONF (Paul Diedhiou); 021-PCA-CC (Ebaye Sidina) (2)	Clinic: Encourage people to make meaningful connec- tions with nature, Because the more people connect with, learn about & love nature, the more they will want to conserve & protect it. (Yose Cornier, IUCN #Nature- ForAll, USA) 016-BIO-CC (2)	Clinic : L'évènement sera organisé sous format d'une présentation Powerpoint du guide méthodologique pour la mise en place & la gestion d'une aire marine protégée (Mamadou Sidibe; Aires Marines Communautaires Protégées; Senegal) 080-PCA-PEO-IO-GOV-CONF-STIK (1)
AD1 (70)	Workshop : L'évènement sera organisé pour réunissant tous les Partenaires techniques & financiers des Parcs nationaux du Sénégal, les acteurs de la conservation, les chercheurs, les populations périphériques avec différents volets (DIEDHIOU, 012-PCA-CONF (1)	Workshop: Global targets play critical role in Global Biodiversity Framework. Need to place great emphasis on equity, which can be assessed using SAGE tool (IIED) & partners. This session will show use of the tool in Green List candidate sites. (Donald Chikumbi, Copperbelt University, Zambia), 066-PCA-GOV (2)	Workshop: Build professional, accountable & responsible ranger workforces, implementation of codes of conduct is crucial. We will create awareness on Code of Conduct. (Olga Biegus; Int. Ranger Federation, 014-PEO-GOV) (1)
AD2 (50)	Clinic: Explore PA way with Collaborative Management help create new perspectives so PAs actively & compet- itively seek best partners & models for agreements to attract support & provide long term solutions. (Alistair Pole; Zimbabwe) X55 (1)	Community conservation initiatives vital for biodiversity conservation. However, effectiveness & continuity need to establish locally-adaptive conservation financing initiatives. (Samson Obiene; Kenya) 019-PCA-SUF; (2)	Film: Video APAC (MP\$ file 1.2.gb) 9 min, French sub-ti- tles, no commentary; Mauritania, seal conservation, radio collaring - By Monk Seal Conservation Program #292 (3)
AD3 (30)	Clinic: PAs are linked with nature & people beyond their boundaries & are impacted by social, economic, & security policies. Environmental intelligence can help understand & respond to these linkages to better protect nature within & outside PAs. (Snow, 021-PCA-GOV) (2)	Clinic: will explore partnerships with other networks in SADC & elsewhere to scale up in situ conservation & sustainable use of CWR within PC&As & promote their availability for use & greater food security (Dulloo 022-PCA-GOV) (1)	Clinic: We would like this tool to be used by African Protected Areas to improve the training & capacity of their staff (Gardiner; Southern African Wildlife College; 025-PCA-GOV-CONF-STIK (1)
AD4 (60)	Clinic: Collaboration makes for effective roadmaps & policy, legal & institutional framework needed for biodiversity management & restoration, (Omoyemen, 019-PCA-PEO-BIO-GOV-CC-CON)'; (2)	Workshop: Education Coalition of Zimbabwe brings communities, civil society & private sector to target tobacco farmers to increase awareness & protect the environment with best practices. (Clifton Dawanyi; 004-PEO-CC) (2)	Trois films : coopération pour préserver les zones d'in- térêt majeur d'hivernage d'un grand nombre d'espèces migratrices (086-PCA-PEO-GOV Faucon) (3)
AD11 (80)	Training Campus (by invitation): BIODEV2030 Project Mana KEY reasons: 1) to enable the dissemination of the BIODEV: comes; 2) to meet & reflect on key lessons & takeaways of i	2030 approach to biodiversity mainstreaming & its out-	PAs known for CO2 storage. Using an extended Green List standard, the CO2 storage is transformed into CO2 certificates & brought to Market. (Roman Eyholzer, Porini Foundation, Switzerland) X41 (1)
AD12 (300)	Cross Cutting Theme 4: Science & Indigenous Knowl- edge for Conservation in Africa with respect to Protected & Conserved areas (LS), (T), (CT-6)	Cross Cutting Theme 2: The Impact of Climate Change on Biodiversity & paradigm shift to manage for Change (LS), (T), (CT-16)	Round table : Renforcement 1000femmes rurales à travers les regroupements des femmes agricultrices en relance maraichère, métiers professionnels au-delà de l'alphabétisation de 250 femmes, EBOLA-COVID19 en BENI/RD CONGO pour 14mois. (SCHADRAC KANIKI, EJAD, DRC) 026-PEO-CONF-SUF (2)
Radisson Blue room	Campus: Launch guidelines "Visitors Count! for PAs. Economic analysis of visitation" show how to prepare economic effect analysis by PA managers & local stake- holders. Case studies in South Africa, Zambia, & Brazil (Thiago Beraldo Souza 007-PCA-SUF) (1)	Clinic: Sao Tomé & Principe host unique forests - a priority for conservation. But development challenges of population growth & unsustainable use. How to balance competing interests - a model for conservation at land- scape level. (Marion Tafani 012-PCA-STIK (3)	Workshop: Wildlife Management Areas in Tanzania: Communal PAs & potential to establish wildlife sanctuar- ies as means to Human Wildlife Tolerance. (Dr. Elisabeth Stegmaier & Patricia McCauley Terheli; Kilimanjaro Animal CREW; Tanzania) 110-PEO-BIO-CONF (2)
AD6			

Daily Calendar for Morning of Friday 22nd July Cross cutting themes finishes, report back preparation

	8.30-10.00	10.30-12.00	12.00-14.00
Audit. (2,500)	Leadership Dialogue: Climate Change & the Biodiversity Nexus (LS), (T), (HL-6)	Cross Cutting Theme 4: Science & IK for Conservation in Africa with respect to rural men & women (LS), (T), (CT-12)	Workshop: Agree on framework as a community of prac- tice to engage development & appreciate concerns for sustainable infrastructure development through effective partnerships. This will result in identification of gaps that call for research. (Lucy Wariung; ACBA; Kenya) X76 (2)
MH1 (400)	Clinic: The Global & Climate change Impacts commu- nities. Learn build tools & guidance for Gov., NGO's & communities to develop climate change coping strategies. (Chris Zganjar, Africa Biodiversity Collaborative Group, USA) (X48) (2)	Cross Cutting Theme 5: Tools for Innovative Financing to secure Africa's biodiverse land & seascapes (LS), (T), (CT-7)	Clinic: Conservation more than numbers. Discuss latest frameworks, innovations to monitor community conserva- tion ecological, social & institutional outcomes. (Dr. Peter Tyrrell 009-PEO-GOV (2)
T1 (400)	Workshop: KWS helped form 7 LMMAs, & are working with volunteer turtle conservation to which reduce poaching & enhance patrols, monitor & intelligence gathering. (Paul Wambi; KWS 063-PEO-BIO-GOV-CC-SUF (2)	Cross Cutting theme 1: Role of IPLCs, in PCA manage- ment & Biodiversity Conservation (LS), (T) (CT-15)	Clinic: PA management best practice. Share from human-rights based conservation for well-being for nature & people. Present how this can be replicated. Importance of PA in local development, & to support of transboundary management. (Terence Fuh Neba; WWF-CAR; 016-PCA- GOV-STIK (2)
T2 (400)	Roundtable: Redirect financial flows & public investments in natural capital. Understand risks with biodiversity loss in supply chains. Make case for partnerships between finance & conservation. (Pauline Nantongo; African CSOs Biodiversity Alliance; Uganda). 003-BIO-SUF (2)	Cross Cutting Theme 2: Securing a Climate Resilient Future for Nature & People in & around Protected & Con- served Areas in Africa (LS), (T), (CT-10)	Clinic: How Convivial Conservation, Ubuntu, Dignity & Heritage help understand challenges, opportunities with IPLCs' Knowledge. (Wilhelm Andrew Kiwango, The Univ. Dodoma, Tanzania; 020-PCA-STIK (2)
ТЗ (400)	Workshop: NRM institutions encourages collaborative management. Understand socio-biological & socio- eco- nomic aspects that shape ecosystems & make conser- vation sustainable. We will explore role of action learning. (Bhoke Werema; CANCO, Kenya), 010-BIO-GOV (2)	1 Workshop: Impacts of Covid to long-term recovery, the event will provide guidance & recommendations for strengthening the resilience of PCA sites & networks in Africa. (Thierry Lefebvre; IUCN, Switzerland) 088-PCA-BIO- GOV-SUF (1)	Importance of community led & based natural resource management most effective conservation model that balances conservation & community livelihoods as well as mitigates land-based conflicts. (Edward Porokwa, Pastoralists Indigenous Non Governmental Organization's Forum (PINGO's Forum); Tanzania 027-PCA-PEO-GOV- CC-CONF (2)
AD1 (70)	Training Campus: IMET is a powerful Protected Area Manag between protected areas planning, management & monitorir use as a decision-support tool 039-PCA-GOV & 040-PCA-GO	ng. Introduce the knowledge & use ("hands-on") of IMET & its V (Roggeri) (1)	Clinic: LMMA rights empower them to be in charge of NRM & effective measures. MIHARI, Mwambao & COMRED enhance LMMAs' improve legal framework (Solofo Ralaimihaotra; MIHARI Network; Madagascar, 028-PCA-GOV) (2)
AD2 (50)	Clinic: Equitable PAs more likely to be effective. But ensure investment supports livelihoods, & rigorous independent monitoring of social impacts of PAs, to ensure equity & effectiveness. (011-PEO-GOV-CONF, Rakotonarivo) (1)	2 Clinic: Community conservation, requires collective learning & action based on agreed frameworks to reach & measure conservation success. Session is an initial step for making community conservation, the right conser- vation model. (Jose Monteiro; ReGeCom Mozambique. 043-PCA-BIO-PEO-GOV) (2)	Café: Connectivity of waders & terns formed links between Bijagós & 19 counties, as birds migrate from Bijagós to W. Europe to & from breeding areas to the north, highlighting links across continents. Such international coordination to protect species can be placed high in conservation agen- da through discussing this topic. (Jose Augusto Alves; University of Aveiro; Portugal; 093-PCA-GOV (3)
AD3 (30)	Clinic: We provide insights into knowledge products developed in the Sustainable Wildlife Economies Project & the process of developing a voluntary, market-driven Wildlife Economy Certification Scheme in South Africa (Mathew Child 013-BIO-CC (3)	Cafe : Nous aimerions présenter les données dans un stand, Nous souhaitons avoir un table banc avec 3 chaises, une vidéo projecteur, un ordinateur bien adapté à la vidéo projecteur & un tableau blanc de projection. (RAHAMATA AHAMADA, Direction générale de lenvi- ronnement & des forêts/Parcs Nationaux des Comores) 010-PCA-CC (1)	Clinic: The Forest Development Authority (FDA) is the custodian of PAs in Liberia. Will raise awareness about Lake Piso situated on the Atlantic coast, & is an important catchment area, & for migratory & resident birds. (Osuman Kiazolu; FDA; Liberia); X14 (1)
AD4 (60)	Workshop: Raise awareness for governments to conside certification of PAs as a strong tool to enhance forest management (FSC), revenue generation, mitigation of climate change impacts, & contribution to the global agendas. (Annah Agasha; 009-PCA-CC (1)	Valorisation des meilleurs pratiques en matière de gestion durable des aires protégées en Afrique de l'ouest (Observatoire pour la biodiversité & les Aires Protégées en Afrique de l'Ouest (OBAPAO) ; Centre de Suivi Ecologique (CSE); Senegal) X49	Clinic: Justify need to capture ESR flows & improve livelihoods for coastal communities. Will invite investors & collaborators to explore how to make this a reality by pooling, skills, experiences & resources. (Dresy Lovosoa, WWF, Madagascar) X18 (2)
AD11 (80)	Updated version of our biodiversity valuation solution focuses on Blockchain" & Distributed Ledger Technology as a biodiversity "credit system. This centralises field data & other information from various sources through validation that may lead to building a verifiable Offset/ Credit option available to investors in Africa. (Robin Brown 001-PEO-SUF) (3)	Cross Cutting Theme 6: Planning for infrastructure with appropriate safeguards (LS), (T), (CT-8)	Contribuer à la lutte contre la dégradation de l'écosys- tème aquatique & la perte en biodiversité ichtyologique de la Sangha par la promotion & le développement des techniques d'exploitation des pêcheries communau- taires durables comme alternative au braconnage dans AP Dzanga-Sangha en CAR. (Dieudonné Bruno CAR). 012-PCA-GOV (2)
AD12 (300)	Workshop: Tacare approach & community mapping through stories & case studies on how data & technol- ogies meet needs & lead to improved development &r management of PA networks & results. (Lilian Pintea, Jane Goodali Institute, USA)(X107-PCA-STIK-PINTEA (2)	Cross Cutting Theme 3: Food production & healthy eco- systems: Conflicts between farmers, pastoralists & wildlife (LS), (T), (CT-11)	Campus: Assess effectiveness of conservation in PCAs key to adaptive management. Introduce overview of use of tools in the E. & S. African region. Will dive into use of, IMET, & hear from practitioners how they used this tool. (Arthur Tuda; WIOMPAN; Kenya)047-PCA-GOV (1)
Radisson Blue room	Clinic : Les Fonds Fiduciaires de Conservation, c'est fiable & c'est viable, & c'est innovant-Aires Marines Protégées-Accord de Pêche & REDD+ (ANDRIAMAHENINA , 008-PCA-SUF (1)	Clinic: Lessons from innovative PA management. Over a decade of diverse & inclusive/human-rights based conservation & collaboration between conservation, governmental, science & indigenous & local organizations to achieve well-being for nature & people. (Terence Fuh Neba; WWF-CAR) (1)	Clinic : Efforts de conservation dans CAR Tchad sont mis à rude épreuve par le braconnage, conflits armés & une dynamique de transhumance transfrontalière Soutenues par WCS, les autorités publiques & les communautés locales ont adopté une dynamique positive qui intègre les dimensions conservation. (Florent ZOWOYA, Wildlife Conservation Society – CAR) 032-PCA-GOC-CC (1)
AD6	Kigali Call to Action Group meeting room		

Daily Calendar for Afternoon of Friday 22nd July Cross cutting themes finishes, report back preparation

	14.00-15.30	16.00-17.30	18.00-20.00
Audit. (2,500)	Stream 1: Wrap up session – agree on action points, recomn		
MH1 (400)	Stream 2: Wrap up session – agree on action points, recomm	•	
T1 (400)	Stream 3 Wrap up session – agree on action points, recomm	iendation, challenges (LS), (T)	Workshop : Monter comment de nos jours, les APs peuvent être un contributeur non négligeable voir un moteur de développement durable au niveau local & même national tout en préservant sa fonction écologique. (LEKEALEM Joseph; Ministère des Forêts & de la Faune; Cameroun) 057-PCA-GOV (1)
T2 (400)	Workshop: "MPAs: Law enforcement, security & econo- my", (Eng-Fr): 084-PCA-GOV (Christian Bueger), 087-PCA- GOV (Ahmedou Taleb) (2)	Workshop: 7 African states to link economic developme. & biodiversity conservation: BIODEV2030 an innovative biodiversity mainstreaming approach (Pauline Teillac-Des- champs, Expertise France) 010-BIO-GOV-STIK (3)	Café: Inclusive governance is critical in conservation & sustainable use. Peer-to-peer learning between practi- tioners is key to find solutions & we will link practitioners & provide a platform for exchange & mutual learning on governance. (Nancy Ingutia; Ol Pejeta Conservancy; Kenya), 079-PCA-PEO-GOV (2)
T3 (400)	Workshop: Conservation partially delivered community ambitions & conservation benefits This builds a means for conservation in peoples' lives, & successfully achieve Targets. (David Obura, CORDIO, Kenya, 044-PCA-GOV (2)	nservation partially delivered community onservation benefits This builds a means on in peoples' lives, & successfully achieve différents volets (actions de conservations dans les aires	
AD1 (70)	Café: Increase awareness of community-based conservation, & critical natural resource challenges in Kenyan forests. Highlight empowering communities to manage natural resources. (Kristina Bell; Kiptogot Community Forest Association; Kenya; 082-PCA-PEO-GOV-CC-STIK (2)	Media: people learn through entertainment, they will find ways to interest various social layers in environmental issues, which results in a motivated, informed population capable of making changes. (Mel 002-PEO-STIK) (2)	
AD2 (50)	Workshop: Achieving equitable governance of protected and conserved areas using Site-level Assessment of Governance and Equity (SAGE) and why this is crucial for conservation policy including the global "30x30 target" (X92, Lubilo-Franks) (2)	nd conserved areas using Site-level Assessment of overnance and Equity (SAGE) and why this is crucial for onservation policy including the global "30x30 target" shared with other Countries will motivate them to under- take National Lion Census to guide management of lions.	
AD3 (30)	Workshop: Natural Capital Accounting to facilitate PA management in West Africa: Importance of local data. (Christophe BOESCH 010-PCA-BIO-GOV-STIK) (2)	agement in West Africa: Importance of local data. wood sector. The NNF will show value & opportunities of	
AD4 (60)	Training Campus: An Ecosystem Approach to PA Manageme (Masundire) (1)	nt in Africa: shifting paradigms (CEM) 091-PCA-PEO-STIK 1	Clinic: Know if communities are happy with PAs, & assess interaction between communities & PA & examine problems associated with wildlife conservation & rural communities. (Fingesi U.I.; Federal College of Wildlife Management, FRIN. Nigeria), 012-PEO-GOV-CONF-SUF- STIK-INFRA (2)
AD11 (80)	Workshop: showcase sustainable use of natural resources - can only be achieved through leadership & involvement of communities conserving their resources. We highlight where this is happening, & use of tools to enable commu- nity ownership of data & advance stewardship. (Tom Rowley; Forest Peoples Programme; England, X78)	Campus: Through peer- learning. Governments & PA Manage Guidelines for developers & investors of projects in designate USA), 004-PCA-PEO-BIO-STIK-INFRA (1)	
AD12 (300)	Workshop: showcase sustainable use of natural resource - can only be achieved through leadership & involvement of communities conserving their resources. We highlight where this is happening, & use of tools to enable commu- nity ownership of data & advance stewardship. (Tom Rowley; Forest Peoples Programme; England, X78)	Workshop: Tackling wildlife crime requires approach to respond to various factors. Will share measures (K9, equine & aerial response units) to combat poaching with initiatives to engage youth, public & communities to understand value of biodiversity. (Carlien Roodt, Project Rhino, South Africa; 093-PCA-PEO-GOV-CONF) (3)	Workshop: Transforming Africa's trophy hunting zones by developing alternative uses & diversifying governance. (Dr. Paul Scholte, GIZ, Ivory Coast) 004-PCA-GOV (2)
Radisson Blue room	Clinic: Women-led Locally-Managed Marine Areas for octopus, spearheading local fisheries management & strengthening social cohesion along the Kenyan coast. (Gurveena Ghataure; Fauna & Flora International, Lamu, Kenya) X24 (2)	Clinic : Le réseau est un regroupement des Coaches qui visent à accompagner les Etats africains dans l'amélioration de la gestion des AP à travers un appui dans la réalisation d'évaluations de l'efficacité de gestion & dans l'analyse des situations rencontrées, en vue de promouvoir des prises de décisions orientées aux résul- tats. (DIARRASSOUBA Issa, Réseau Africain des Coaches IMET, Ivory Coast) 021-PCA-GOV-SUF) (1)	Café: Modelo de gestão participativa (António Jesus Silva Rodrigues Pires; (IBAP) - Dr. Alfredo Simão da Silva. Guinea-Bissau) 051-PCA-GOV (2)
AD6			

Daily Calendar for Morning of Saturday 23rd July Wrap up & closing ceremony

	8 20 10 00	10.20.12.00	12.00-14.00
	8.30-10.00	10.30-12.00	12.00-14.00
Audit. (2,500)	Workshop: community participation, yet many PAs man- aged in a fences-&-fines approach - excludes people who have lived there for generations. Bringing together different stakeholders, we will find best practices to provide a plat- form for deeper understanding to evoke real participation & integrate traditional knowledge. (Beth Kaplin; Center of Excellence in Biodiversity and Natural Resource Manage- ment, University of Rwanda). 008-PEO-STIK (2)	Clinic: Human Rights Violations in PA Law Enforce- ment-causes, prevention, & management. Critical part of PA governance needing attention. Clinic will explore how to improve best practice in law enforcement governance & safeguards for local communities (Ofir Drori, Eagle Net- work; Paul Elkan, Africa Conservation Impact) (2)	
MH1 (400)	Workshop : Développement des infrastructures doit intégrer les préoccupations environnementales. Ce thème permettra de comprendre comment nous pouvons réduire l'impact des infrastructures sur la biodiversité en explorant des méthodes pratiques & innovantes. (Adam Ceesay, 001-BIO-INFRA) (3)	Workshop: Business needs PCAs to sustain themselves & this session will respond to 'How do Africa's PCAs deliver solutions to securing the backbone of natural infrastructure essential to the business community? (Andrea Athanas, AWF), 028-PEO-SUF-INFRA (1)	
T1 (400)	Workshop: If used incorrectly PAME is largely subjective & do not accurately reflect conditions. Will interrogate the accuracy of assessment results & how those results are used to improve management effectiveness. (Peter Mills; Game Rangers Association of Africa (GRAA) South Africa) X89, (1)	Workshop: Trophy hunting contribute to finance PCAs. But is controversial with polarized & contested facts. Will highlight ecological, social & economic impacts of trophy hunting & to further analysis (Dilys Roe; IUCN SULI & Liveli- hoods Specialist; England) 069-PCA-PEO-SUF (3)	
T2 (400)	Campus: Workshop to help practitioners gain an understandin & how it helps conservation organizations be more successfu by organizational development experts as well as form their p Tanzania) 019-PEO-GOV-CC-CONF-SUF-STIK-INFRA (2)		Clinic: Lion Carbon to protect wildlife from Zambezi to Luangwa (1 of 10 lion strongholds), & restore Luangwa im- proved livelihoods, protect forests to store 1 bill tons of C2. (Chloe Evans, BioCarbon, 089-PCA-BIO-CC-SUF-STIK (2)
ТЗ (400)	Clinic : Contribuer à la lutte contre la dégradation de l'éco système aquatique & la perte en biodiversité ichtyologique de la Sangha par la promotion & le développement des techniques d'exploitation des pêcheries communautaires durables comme alternative au braconnage dans les AP de Dzanga-Sangha. (WANEYOMBO-BRACHKA, Centre Wbr, CAR). 012-PCA-GOV (2)	Workshop: Communities can conserve but seldom have opportunities. Community-based efforts fail to provide communities with skills & support, because communities aren't in the driver's seat. Five community-driven conser- vation initiatives show different approaches that leading to impact for people & wildlife. (Damian Bell; Honeyguide Foundation; Tanzania, 015-PEO-GOV)(2)	Café: Declining nat. resources inevitable without address- ing drivers. Governance, management & sharing of best practices can reverse this but needs M&E. We will build consensus on practical approaches to demonstrate CBN- RM occurs in fairly governed, effectively managed contexts of marine resources begins & stops at the doorstep of governance. (Lenice Ojwang; CORDIO East Africa; Kenya), X80 (2)
AD1 (70)			Cafe : Action de conscientisation sur bintérêt écologique social de bécosystème, & implication des autorités locales concernées & population ainsi que la société civile pour une charge de protection de la foret périurbaine. (Slimen; Tunisia ; 050-PCA-GOV) (2)
AD2 (50)	Clinic: Demonstrate ABS to local livelihoods & conserva- tion; showcase practice, share lessons. An incentive to conservation & sustainable management of African parks (Mukonyi Kavaka; Wildlife Research & Training Institute; Kenya), 021-PEO-GOV (1)	Clinic: Conservation Overstretch in Central Africa & beyon what role of scaled up funding, enhanced management & strategic retreat, to assure the conservation of priority protected areas. (Dr. Paul Scholte, GIZ, Ivory Coast) 002-PCA-CONF (1)	Clinic: Women's voices to play a stronger role, & encourag woman to participate. Women for Conservation opportuni- ties to diversify income & use APAC to share lessons, build relationships & create a network (Willie Boonzaaier, IRDNC; Namibia) 015-PEO-GOV-SUF (2)
AD3 (30)	Mieux outillées et responsabilisées, les communautés riveraines des aires protégées peuvent contribuer effica- cement à une meilleure conservation de la biodiversité tout en améliorant leur bien-être et leur résilience au changement climatique (Karama Mamadou; Association de Gestion des Ressources Naturelles et de la faune de la Comoé-Léraba; Burkina Faso) 063-PCA-GOV (2)	Clinic: Nature, Wealth, & Power (NWP) framework help account for many dynamics, & help us think through chal- lenges & break them into smaller, issues in ways that ac- count for partnerships, resources, governance structures. (Jennifer Park, RTI International, USA). 024-PEO-GOV (2)	Comment l'amélioration des connaissances sur la biodiversité & les interactions homme-faune, peut être utile pour améliorer la santé publique en augmentant la résilience aux épidémies de zoonoses dans les commu- nautés locales. Cas du Parc National de Cantanhez, en Guinée-Bissau. (Américo Nhanga Walanse Sanhá, IBAP 012-BIO-STIK (3)
AD4 (60)	Workshop: Africa to raise collective voice & mobilize citizens & decision makers to take action to conserve & protect marine biodiversity beyond national jurisdiction, in- cluding through the protection of areas key for biodiversity. (Ben Boteler, 004-BIO-GOV (3)		
AD11 (80)	Workshop: Improve conservation to address similar challenges. Establish relations between people & nature to implement best practice in communities tackling conser- vation issues. (Dube Kundai R; Zimbabwe Parks & Wildlife Management Authority) 019-PEO-STIK (1)	Workshop: Urgency of threats posed by mining for renewable energy. confront threats, & avoid increased loses to PAs & biodiversity. A network will watch out for & communicate developments so reactions can minimize threats. (Daryl Bosu; A Rocha Ghana) X23 (3)	Workshop: equitable governance key to combat biodiversity loss. Will equip rightsholders, PAs & OECMs to understand governance, improve situation, & share learning. (Eneya M'simuko; Zambia Community-based Natural Resources Management Forum) 062-PCA-GOV (1)
AD12 (300)	Café: Poaching - crucial to enhance integrity & ensure rangers operate. Assess PA protection & remedy shortfalls (Andrew Campbell; Game Rangers Assoc. of Africa) 111-PCA-BIO-GOV-CONF (1)	Indigenous people are the most important stewards, & for effective & efficient PAs, indigenous people must be involved in decision making & implementation. Neglecting indigenous people might result in failure. Necessary to elevate rights, responsibilities & roles of indigenous people, local communities; & incorporate indigenous knowledge & practices in implementation of PA conservation solutions. (Achare Elvis Ayamba; Environment & Food Foundation (E2F), 004-PEO-STIK (2)	
Radisson Blue room	Anunciar o nível alcançado pela Guiné-Bissau em termos de classificação de áreas protegidas; Apresentar a especi- ficidade do modelo adotado pelo país; Discutir a eficácia e os constrangimentos do modelo; (Justino BIAI, IBAP – Dr. Alfredo Simão da Silva; Guinea-Bissau) 042-PCA-PEO-GOV (1)	Clinic: Chirisa Safari Area is well positioned for wildlife restoration interventions that can be scaled up in wider Sebungwe region targeting similarly stressed PAs. (MID- WELL KAPESA, Zimbabwe Parks & Wildlife Management Authority) X9 (3)	Café: Community conservation (CC) has potential in conservation, while improving livelihoods. However, setting (CC) as an effective conservation model, requires learning & action. The session is an initial step to make CC the right conservation model. (Jose Monteiro; ReGeCom, Mozam- bique) 087-PCA-PEO-GOV-CC (2)
AD6	Kigali Call to Action Group meeting room		

south pole

Nature-based Solutions climate projects in your Protected Area.

Act with Nature.

Since its founding in 2006, South Pole has worked with almost a thousand landholders, governments, communities and conservation organizations to identify and support emission reductions from Nature-based Solutions (NbS) projects worldwide.

South Pole is uniquely positioned to support you in adding a sustainable and supplementary source of income to fund your Protected Area through NbS carbon finance that helps create equitable outcomes for all.

Rwanda Highlights

Welcome to Rwanda, the land of a thousand hills! Blessed with extraordinary biodiversity, with incredible wildlife living throughout its volcanoes, montane rainforest and sweeping plains Rwanda offers you an exceptional range of great value excursions to suit all ages, interests and abilities. Rwanda's stunning scenery and warm, friendly people offer unique experiences in one of the most remarkable countries in the world. All excursion packages offered through accredited partners are carefully designed to suit your itinerary.

For more information, explore the available opportunities below:

Visit Rwanda Rwanda Tours and Travel Association

DISCLAIMER:

While every effort is made to ensure that the information contained in this handbook is correct, some of the information, particularly those supplied by third parties, can change without notice. We do not guarantee and accept no liability whatsoever arising from or connected to, the accuracy, reliability, currency or completeness of the excursion booking sites.

The description and translations of each excursion have been provided directly by the excursion organisers. IUCN APAC is not responsible for the content or translations on third-party websites. While the service providers make every effort to provide on-time service, IUCN APAC does not guarantee departure and arrival times, which may be delayed by any number of factors, including weather, traffic or road conditions, mechanical problems or any other cause or other conditions beyond the service providers' control. As such, IUCN APAC makes no warranty as to the weather, or that excursions will be uninterrupted, on time or meet the requirements and expectations of excursion participants. IUCN APAC disclaims any responsibility and liability for any loss or damages that arise from dealings or disputes between excursion participants and excursion organisers.

Delegate Travel & Accommodation in Kigali

IUCN APAC has partnered with TravelZuri a Rwanda based travel agency to support delegates with their travel and accommodation needs. A quota of rooms has been negotiated for the IUCN APAC 2022 participants in hotels in the city center and reasonably close to the conference venue. Reservations will be made on "first come, first served" basis. The hotel quotas are valid until one months before the conference. After that, APAC cannot guarantee the availability of the hotel rooms but will assist you in finding accommodation. The negotiated hotel fee includes breakfast and all applicable taxes. All hotel fees are payable directly to the hotels.

Click here to book your accommodation for your stay in Kigali. Delegates who wish to book their travel and accommodation on their own are free to do so however you are highly encouraged to use the IUCN APAC agent to take advantage of the negotiated rates as an APAC delegate.

Restaurants

The Kigali Convention Center and the Radisson Blu Hotel both have restaurants to cater for various dietary requirements. Kigali Heights which is a five minute walk from KCC holds a wide range of restaurants where delegates can sample local food.

Personal Belongings and Valuables

While IUCN APAC will endeavor to ensure general delegate safety at the Congress, it is the responsibility of all delegates to ensure the security of their belongings and valuables while attending the congress. IUCN APAC shall not be held liable for any loss of belongings.

Currency & Banking Services

The unit of currency is the Rwandan Franc (RWF). Exchange rates are subject to fluctuation. Central bank rates can be found on the National Bank of Rwanda website www.bnr.rw

Bureau de Change branches (Forex Bureaus) are available at the airport and across Kigali.

Banking hours are 08:00-18:00 (weekdays) and 08:00-15:00 (Saturdays). Most banks have cash dispensing machines accepting Visa, MasterCard and Cirrus. Bureau de Change facilities are available across Kigali.

Most internationally recognized currencies and travelers' cheques can be exchanged at commercial banks, hotels and international airports. Major credit cards are accepted in most hotels, restaurants and shops.

Weather in Rwanda

Fractionally south of the Equator and with much of the country lying at altitude, Rwanda enjoys an agreeable tropical highland climate. Temperatures vary considerably between locations, but vary little from month to month.

Peak temperatures rarely exceed 30°C (86°F) in the daytime or drop below 15°C (59°F) at night. Akagera is generally the warmest and the Virunga mountains the coolest. The average daily temperature in Kigali is 21°C (70°F).

There are two rainy seasons in a year, from mid-February to May and mid-September to mid-December. The dry season, from June to mid-September, sees light cloud cover and occasional light rainfall. The roads and paths tend to be easier to navigate in this period.

Medical and Emergency Contacts

The nearest main hospital to the Kigali Convention Center is King Faisal hospital which is a five minute drive from the Convention Center.

King Faisal Hospital contact numbers:-

- 1. Emergency Services -250787458888
- 2. 24 Hour Hotline -3939

If no other assistance is at hand, emergency numbers are as follows:

- 1. 111 for the fire department
- 2. 112 for ambulances and medical emergencies
- 3. 113 for traffic accidents
- 4. 999 for the police

For more information, please visit the Rwanda Ministry of health website at https://www.moh.gov.rw/services and the Rwanda Biomedical Services Website at https://www.rbc.gov.rw/index.php?id=631

Annex 1: List Of Posters For Display

Code	Title	Lead	Stream
001-PCA-CC	Range shifts due to climate change may causes species to move out of protected ar- eas, and could result in species range dynamics that reduce the relevance of the current fixed protected areas in the future conservation strategies (National Protected Areas Authority, Sierra Leone)	Joseph Ranto Musa	Biodiversity
001-BIO-CONF	Renforcer les connaissances des comités d'alertes en Identifiants d'autres zones concernées par ce conflit, produire une cartographie claire de la zone, sensibiliser les autorités et les communautés cernées. (Congo Basin Conservation Society DRC)	Witanene Milenge	Biodiversity
001-PEO-CC	l'integration des jeunes dans les actions de protection de l'environnement, les aires protegees , susciter la conscience de notre communautes pour eviter de tuer les ani- maux qui sont notre patrimoine, lutter contre le changement climatique a travers nos actions et la protection de fone et floor (plantation des arbres fruitiers, soutenir l'agricul- ture familiale). Promotion Des Actions Communautaires CERPAC RDC)	Adelard Matabaro	Biodiversity
001-PCA-SUF	Financement d'une aire protégée avec utilisation durable des ressources naturelles. Quelle gouvernance pour une telle catégorie d'aire protégée? (Réserve spéciale d'avi- faune de Ndiael, Senegal)	Mamadou Badji	Biodiversity
005-PCA-GOV	Création des aires protégées : Cette action concerne essentiellement les parcours moyennement dégradés et qui ont un potentiel de reprise important. Elle est avanta- geuse notamment par son coût réduit. la simplicité de sa mise en œuvre et la protec- tion de grandes superficies. La résilience des parcoures. Amélioré le cadre de vie de la population nomade. (développement de l'atlas, Algeria)	Missat Lakhdar	Biodiversity
003-PCA-STIK	Les affichages et les rencontres périodiques contribuent aisément à la bonne gestion des APAC. (APAC du Lac de Guiers, Senegal)	Adama Dieye	Biodiversity
001-PEO-GOV	This is a project being piloted under DFFE in the existing "Kids and Parks Programme" and is focusing on building capacity in the Biodiversity and Conservation sector, more especially to youth living in and around protected areas and disadvantaged back- grounds. ECSA is twofold, firstly, it seeks to build capacity of future environmental champions in Africa through targeting youth in their mid-teens, secondly, overtime it seeks to create specific capacity of black females in biodiversity and conservation. Its objective is to bridge the gap amongst youth in high/ secondary schools (Grades 9-12), from disadvantaged schools in rural schools. The project believes in affording youth at secondary school level the opportunity to explore the vast variety of careers in STEM, while also expanding their ability to access the vast options of science related career paths, more specific to Biodiversity and Conservation, available in not just South Africa but globally. (Department of Forestry, Fisheries, and the Environment (DFFE), South Africa)	Lungelo Dube	Biodiversity
002-BIO-CONF	Using environmental education as a tool to enhance understanding of the environment in a biodiversity hotspot in South Africa. (Youth For The Environment, South Africa)	Catherine Kühn	Biodiversity
007-PCA-GOV	This concept intends to raise awareness to the communities on the existence of a large mass of CWR biodiversity in conservation and protected areas for inclusion in conserva- tion planning and management. (Tropical Pesticides Research Institute – National Plant Genetic Resources Centre, Tanzania)	William Chrispo Hamisy	Biodiversity
001-PCA-BIO-CC	AQUAFRIK présentera devant un public des posters, photos, des illustrations scienti- fiques les differents groupes d'organisme de quelques zones humides des zones fronta- lières du Cameroun, Guinée équatoriale et Gabon. (AQUAFRIK- Cameroun)	Banga Medjo Marie Pascale	Biodiversity
002-PCA-PEO BIO-	Malgré les défis auxquels il fait face (changements climatiques, construction d'un port à proximité de sa zone périphérique, etc.) le PND reste un modèle majeur de gestion in- clusive. Le PND souhaite présenter son modèle de gestion unique intégrant les aspects environnementaux et socio-économiques à la restauration et à la préservation des écosystèmes. (Directeur, Parc National du Diawling, Mauritania)	Daf Sehla Ould Daf	Biodiversity

Code	Title	Lead	Stream
001-PCA-GOV-CC	L'enjeu des politiques publiques dans la gestion des aires protégées dans les archipels aux climats vulnerables: le cas spécifiques du Cap Vert. Un contexte insulaire de gestion des aires protégées dans un space unique, atipique et vulnerable dans toutes les sens. (Société Civile, Cape Verde)	Aidil Carva- Iho Martins Barbosa Borges	Biodiversity
005-PCA-PEO-BIO- GOV-SUF-	This project demonstrates the first effort in several decades of a public-private partner- ship of its kind in Kenya aimed to re-introduce a wildlife species that had gone extinct to the northern slope of the Mount Kenya Forest. It brings together key stakeholders with the highest level of experience and expertise in wildlife conservation to join hands with the local communities to bring back and protect a rare species for benefit of conserva- tion and economic development. (Lewa Wildlife Conservancy, Kenya)	Dominic Maringa,	Biodiversit
002-BIO-CC	Appui à l'agroforesterie de l'écosystème riveraine du Parc National de Virunga à Kanombe. (MUTIKWETU, DRC)	Jerudi Shamba Elie,	Biodiversit
004-BIO-STIK	Working entirely within African protected areas to deliver life-saving veterinary care, Gorilla Doctors is a great example of in situ biodiversity-focused work that is making a tangible difference for the sustainability of a keystone species for African parks. Gorilla Doctors is saving a species, one gorilla at a time. (Gorrilla Doctors, USA)	Kirsten Gilardi	Biodiversit
008-PCA-BIO-STIK-	Cette expo permet de connaître par l'image le mode de vie des Pygmées et d'envisager comment peut-on concilier conservation de la biodiversité et intérêt des populations locales aux abords d'une aire protégée. (Centre de Recherche pour l'Environnement, le Développement et les Peuples Autochtones en Afrique (CREDPAA)	Jean Nke Ndihi	Biodiversit
013-PCA-GOV	Il s'agit de présenter un poster sur l'Université Senghor d'Alexandrie en Egypte. L'Univer- sité Senghor, un opérateur direct de la Francophonie, forme depuis 30 ans, entre autres, des cadres gestionnaires de l'Environnement et des Aires protégées de plusieurs pays d'Afrique et d'Haïti. Le poster présentera les formations offertes ainsi que la cible. Le but de la participation au congrès est de faire connaitre l'Université et d'établir des liens avec d'éventuels partenaires (Université Senghor, Egypt)	Sogbohos- sou Etotépé A	Biodiversit
012-PCA-PEO	les aires protégées, en général, et les parcs nationaux, en particulier, se doivent d'être ancrées dans les cultures africaines, mieux dans la culture scientifique et technique africaine. D'où la question de savoir comment en faire de vraies écoles, des centres permanents d'apprentissage. Le présent papier se propose de répondre à cette problé- matique en s'appuyant sur le concept de « nature comme laboratoire ultime » de David Western.(2002). (Cameroon Environmental Watch)	Professeur Ngoufo Roger	Biodiversit
013-PCA-BIO-GOV-CC	A exploração do Petróleo na zona costeira pode constituir uma ameaça sobre os recursos naturais e a Biodiversidade, principalmente na destruição dos mangais, fauna marinha e na poluição das praias, em caso de derrame do petróleo. (ONG PALMEI- RINHA; Guinea Bissau)	Nicolau Mendes;	Biodiversit
002-PEO-CONF	Para obter as mudanças de comportamento e diminuir a pressão sobre as tartarugas marinhas, é necessário aprofundar a análise e avaliar a perceção das comunidades locais em relação às tartarugas marinhas, conhecer as suas motivações, o contexto so- cial e cultural do consumo de tartarugas marinhas, perceber quais os melhores canais de comunicação, e qual a melhor estratégia de comunicação e de sensibilização que permita de facto alterar comportamentos e diminuir o nível de captura e consumo de tartarugas marinhas na Guiné-Bissau.(Institut de la Biodiversité et des Aires Protégées - IBAP; Guinea-Bissau)	Aissa Regalla De Barros	Biodiversit
004-BIO-CONF	Make the local people more aware of the Value of Wildlife -staring with Mega herbivores and ending up with small and endangered mammals. (Project Rhino Alliance; South Africa	Grant Fowlds	Biodiversit
004-PCA-CC	Bamboo conservation and Climate Action; Riparian land restoration. We want to achieve 10% forest cover in kenya by planting 10,000 bamboo per year. (Moonlight Initiative LTD, Kenya)	Wendy Adhiambo Omanga	Biodiversit
005-BIO-CC	This project seeks to rescue the biodiversity and the ecosystem along Ruhuhu River basin from the ever growing threats caused by human activities in the upper streams and at the river mouth as it enters Lake Nyasa. (Participatory Development Concern; Tanzania)	Maqway Baran	Biodiversit

Code	Title	Lead	Stream
006-BIO-CC	Notre souhait c'est de poursuivre la communication environnementale, mais notam- ment faire la promotion et la vulgarisation des briquettes comme source d'énergie alternative à la déforestation et par conséquent une voie d'atténuation des impacts cli- matiques. (Action pour l'éducation environnementale, genre et developpement durable au Kivu; DRC	Bwenge Madeleine	Biodiversity
008-PCA-CONF	Demostrar melhor forma da exploração dos recursos naturais em benéficio das comu- nidades residentes. (Instituto da Biodiversidade e das Áreas Protegidas, Guinea Bissau)	Tomé Mereck	Biodiversity
015-PCA-BIO-GOV-CC	Il s'agit de mettre en place une stratégie africaine de la conservation de la biodiver- sité à travers les aires protégées. Pour y parvenir, il faut disposer d'un cadre normatif continental portant la gestion et la conservation des aires protégées. Ce cadre devrait conduire à une co-gestion efficace des aires protégées à la fois nationales et transfron- tières. (http://www.gndr.org ; Senegal)	Adessou Kossivi Nevaem	Biodiversity
002-PEO-CC	We believe the youth can make climate action a tool for business in driving profit and environmental benefits in this challenging times. The solutions to the climate crisis are already known- some found in nature, others in renewable energy and lifestyle or behavioural change. (Sustainable Actions For Nature, Nigeria)	Grace Alawa	Biodiversity
003-PEO-CC	The overall objective is to provide sustainable and climate smart Agriculture inputs to smallholder farmers to increase their income, reduce carbon emission and forest loss in Amhara region through creating accessing to quality agricultural inputs, providing adequate extension services, job creation and women empowering. (Agerie Agriculture Input supplier, Ethiopia)	Agerie Amisalu	Biodiversity
004-BIO-CC-SUF	Currently, natural resources conservation is the optionness strategy for improving the livelihood of the community through mitigating climate change, ensuring food security and protecting biodiversity. So globally and as local it should get more attention. My major target is to Improving livelihood of the farmers; conserva biodiversity, and mitigate climate change. (Government, Ethiopia)	Endale Bekele,	Biodiversiy
004-PEO-CC-STKI	I would like to increase knowledge and awareness among young population in Uganda and beyond in livelihood, SRHR and climate change. (African youth with the light of peace; Uganda)	Johnson Ahabwe;	PCA
005-BIO-SUF-STIK	Inadequate finance and capacity building for grassroots movements and organizations is a huge barrier that hinders youth groups in vulnerable and marginalised communities from implementing their innovative ideas of Protecting and Conserving Biodiversity in Africa. A Pan-African Microgrants scheme that is homegrown will be good for the community-based organizations that are engaging in action oriented solutions is our vision under Inuka. Inuka will empower youth leaders with necessary skills needed to scale up their action on the ground, offer them access to grants, and support them in using the IUCN NbS indicator for impact, as well as working to compile their stories in a multimedia approach. (Youth4Nature, Kenya)	Peter Bu- limo	PCA
005-BIO-CONF	Les conflit s'inscrivent dans le cadre de l'interaction de l'interface aires protégées/Pé- riphéries. Le terrain d'analyse est l'Anthropo-Ecologie. La posture épistémologique de l'anthropo-écologie vise, plus sûrement, à "requalifier" l'homme comme espèce dans la biosphère et la nature comme base de production essentielle des sociétés humaines. (Associations Villageoises de Gestion des Réserves de Faune, Benin)	Kiansi Yanti- bossi,	PCA
005-BIO-GOV	L'encadrement des jeunes autochtones et ceux des communautés locales de bien mettre en pratique les connaissances que leurs ancêtres utilisent pour conserver jusque-là les forêts or ils n'avaient pas leur connaissance ni les armes pour le faire. (ANAPAC RDC; DRC)	Blair Byamungu Kabonge	PCA
005-PCA-CC	Libe green Innovation is committed to solving plastic pollution through waste plastic collection, segregation, reuse and recycle in order to archive zero plastic to oceans. (Libe Green Innovation, Tanzania)	Liberatha Kawamala	PCA
005-PEO-CC	The major area of interest is reducing poverty, by increasing available resource for youth and young women time in labor force by producing more of the seedling of bamboo for commercial and food production. Therefore, this will increase household incomes leading to better standards of living. The project is aimed at using communi- ty-based structures to sensitize their fellow community members to understand this new plant in our area. As a food, fodder for animals and the medical aspect of it. (HIRI CBO, Kenya)	Hesbon Onunga;	PCA

Code	Title	Lead	Stream
006-BIO-STIK	To promote environmental protection activities to avoid degradation. To promote sus- tainable farming practices that will ensure sustainable development in rural livelihoods. (Youth Forum, Kenya)	Gordon Ondiek,	PCA
006-PCA-CC-STIK	Learn more about how we can regenerate rainforests by listening to communities. Rainforest communities don't design siloed, sector-based solutions to reverse defor- estation. Instead, they design exchange systems, consistently defined by the following interdependent elements: healthcare, conservation, livelihoods, and education. We hope participants can learn from this model and integrate a similar approach to achieve rainforest conservation. (Health in Harmony; Madagascar)	Hasina Ny,	PCA
007-PEO-GOV-SUF- STIK-INFRA	Young mother's/pregnant girls generate income and support herself, free from stress and continue with Education. Empower women on financial literature and Business skills. Encourage group saving as they save concelling and behaviour change is discussed to avoid stress or suicide cases in both refugee and national (Home of Humanity; Germany	John Towongo,	PCA
008-BIO-CC	Innovative solution to the adverse effects of climate change on humans (Neduchuks Multi-Business Concept; Nigeria	Chukwudi Egwuagu	PCA
008-PEO-GOV-SUF	Firstly, comprehensiveness: Sustainability embraces both environmental and human systems, both nearby and far-away, in both the present and the future. Secondly, connectivity: sustainability demands an understanding of the world's challenges as systemically interconnected and interdependent. Thirdly, equity: a fair distribution of resources and property rights, both within and between current and future generations. Prudence: keeping life-supporting ecosystems and interrelated socio-economic systems resilient, avoiding irreversible actions, and keeping the scale and impact of human activities within regenerative and carrying capacities. Finally, security: sustainable development aims at ensuring a safe, healthy, high quality of life for current and future generations. (Christian Leadership Action Network; Zambia)	Purpose Daka	PCA
009-PCA-GOV-CONF	Ce projet va consisté en une cartographie des espèces animales sauvages, des oiseaux migrateurs qu'on retrouvent dans le couloir écologique du Parc National de Kahuzi Bièga se trouvant dans la Chefferie de Nindja; Tracer la voie de migration des oiseaux dans la région de l'Est de la R.D.Congo et dans les pays voisins; Impliquer les commu- nautés locales dans la résolution des conflits entre Homme-nature sans leurs privés les valeurs culturelles; Faire un état des lieux du flux des groupes armés sur la disparation des espèces animales dans la région de l'Est de la RD. Congo. En seconde lieu, un plan régional de conservation des espèces animales sauvages et des oiseaux migrateurs dans les aires protégés, dans les réserves communautaires, des forêts sacrés, dans les zones humides entre la RD. Congo et ses pays voisins sera élaboré et mise en œuvre au travers un partenariat qui sera négocié en ce sens. (MKAAJI MPYA asbl; DRC)	Muderhwa Nshombo Gervais;	PCA
021-PCA-BIO-GOV-CC	La zone de arta plage est une zone touristique très prisé du fait de la présence du requin baleine. Arta plage reçoit beaucoup de touristes et impacte la nature et les espèce marin de façon negative. (Djibouti)	Robleh Osman	PCA
023-PCA-GOV	CWR contain many useful characteristics that are beneficial to crops and that can be bred into today's crop varieties to give them for example pest and disease resistance, drought tolerance, as well as mitigating against the impacts of climate change, ensuring food and nutritional security for the future. Within the plant genetic resources commu- nity, CWR value has already been acknowledged for some years, however, protected ar- eas authorities and managers are still not aware about them. With this poster, we would like to raise awareness among the protected area community, about the CWR present in the SADC region, the existing protected areas that could actively conserve CWR in situ and where to collect germplasm for long-term ex situ conservation. This will contribute to the establishment of the recently approved SADC Network for In Situ Conservation of CWR and to the availability of these resources for food and nutritional security of the region and globally. (University of Birmingham, Portugal	Joana Magos	PCA
024-PCA-BIO-CC- CONF-STIK	A travers l'ONG Terre et Communauté souhaite développer les techniques et des outils avec les communautés locales de coexistence entre l'humain et la faune, notamment les éléphants au Gabon. 013-BIO-STIK	We still lack scientific knowledge about Africa's biodiversity. Our study shows for the first time that Africa's raptors are in serious trouble and they rely on protected areas for their survival. (The Peregrine Fund; Kenya)	Darcy Ogada	PCA
017-BIO-STIK	For us to succeed in nature and wildlife conservation, there is need for us to work together and create a level playing field where everybody gets an opportunity to enjoy and interact with nature first hand. This is what this project is doing to Kenya's children, because the more people connect with, learn about and love nature, the more they will want to conserve and protect it. (Wildlife Clubs of Kenya)	George Njagi	PCA
019-PCA-CC	The concept will focus on co-management approach of protected area through the involvement of local communities around protected areas. This will be achieved through the provision of sustainable livelihood and basic social services for fringe communities, building of staff capacity and strengthening protected area management network. (Forestry Development Authority, Liberia)	Evangeline S. Nyantee	People
024-PEO-CC-STIK	We sought to examine the socioeconomic factors that influence rural household in- come in Monduli, Tanzania. Household data, collected from the Socio-Economic Survey (SES) in Esilalei and Oltukai villages was used for the analysis using two models: Model 1 had household variables but not commune variables, whereas Model 2 had commune and household variables together. (African Wildlife Foundation (AWF), Kenya)	Enos Ochieng	People
055-PCA-GOV	Improved governance and equity aspects of conserved areas with much local commu- nity's participation and involvement in decision making (Copperbelt University, Zambia)	Donald Chikumi	People

Code	Title	Lead	Stream
067-PCA-BIO-GOV-CC- CONF	The full participation of local communities as equal partners in the creation and man- agement of Protected Areas that deliver environmental, economic and social benefits has been, in part, overshadowed by the unequal power relations between the different stakeholders involved in the process. The experience of the full inclusion of local com- munities in the creation of the Natural Park of Baía do Inferno and Monte Angra and its management is what we intend to present and share, not as the answer to all problems but as a process that is both challenging and reward (Lantuna; Cape Verde)	Diego Alhinho	People
072-PCA-BIO-GOV- STIK	Building local capacity for science-based conservation is critical for the sustainability of conservation efforts and increasing diversity in the sector. We seek to share lessons learnt on how to develop local leadership in conservation. (Zambian Carnivore Programme; Zambia)	Thandiwe Mweetwa;	People
075-PCA-BIO-STIK	Collaboration and community-level engagement in conservation is very complex and much easier said than done! We aim to share our decades-long first-hand experience with designing and delivering effective multi-stakeholder partnerships that engage and empower local people to demonstrate an alternative approach to rhino protection specifically and advance the theory and practice of community conservation in general to appeal to a wider audience. (Save the Rhino Trust Namibia)	Andrew Malherbe;	People
081-PCA-PEO-BIO	Local communities remain the most intimately linked with the sea turtles and their involvement in sea turtle conservation initiatives is one of the major recurrent themes in the global strategy for the conservation of sea turtles. Whether local, regional, and even global efforts to protect sea turtles and their habitats succeed or fail depends to a larger extent on the active involvement of informed and empowered local coastal communities. (Community-Based Environmental Conservation (COBEC); Kenya)	Timonthy Kakai	People
084-PCA-BIO	"La coopération en action" entre l'Afrique et l'Europe, pour préserver les zones d'intérêt majeur d'hivernage d'un grand nombre d'espèces migratrices. (Office français de la biodiversité, France)	Faucon Naïk;	People
017-PCA-STIK	We would like to share our experience identifying and utilizing world class tech solu- tions to address operational challenges and achieve conservation outcomes. In doing so, we would also like to create greater visibility of OI Pejeta Conservancy, our work to protect a range of endangered and critically endangered species and the creation of our conservation technology Centre of Excellence. (OI Pejeta Conservancy; Kenya)	William Njoroge;	People
020-PCA-CC	Climate change affect communities an their livelihoods. This concept is based on my work experiences and the results of my PhD studies where I analyzeD the vulnerability and adaptation to climate change of local populations in and around marine protected areas (MPAs) in Senegal. The results show that the riparian communities of three MPAs (Bamboung, Joal-Fadiouth and Cayar) are facing climate and non-animate vulnerabili- ties. Strategies for current and potential adaptation options have been identified to over- come the various hazards and these are outlined. Strategies are designed to contribute to the sustainable improvement of the living conditions of communities around the MPAs. (Enda Tiers Monde, Senegal)	Aby Drame	People
071-PCA-GOV	To learn how different stakeholders are promoting gender in conservation and how this is resulting in economic gain for the betterment of not only individual welfare, but also protection of the ecosystem. To develop networks between stakeholders and foster potential collaboration that will promote gender in conservation and enterprise in the represented countries and beyond. (CORDIO, Kenya)	Joan Kawaka	People
103-PCA-PEO-GOV	Raise awareness on the red colobus species and their importance as best indicators for biodiversity lost; Get new actors into the Red Colobus Conservation Network; Share successful story on the creation of a protected area and conservation of red colobus monkey in Nigeria (Red Colobus Conservation Network, Cameroon)	Florence Aghomo	People
003-BIO-INFRA	The Wildlife Orphanage and Rehabilitation Centre will have two main focuses; that is to treat, rehabilitate and reintroduce to the wild where possible the increasing numbers of animals orphaned or injured; and there is going to be research and conservation education. It will help to alert, educate, and excite the public with regard to wildlife, their habitats, conservation, and the need for protection and preservation (Zimbabwe Parks & Wildlife Management Authority)	Stanely Musungwa,	People
